

Research and development company
Uchtekh-Profi

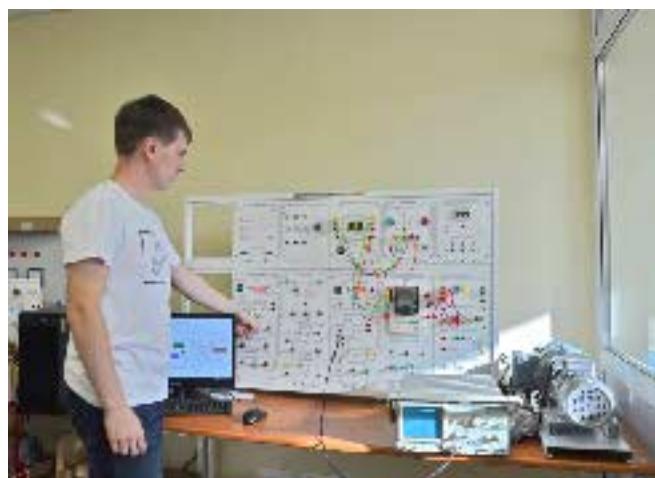

Teaching equipment

and visual aids
for educational
institutions

www.Labstand.ru

«Uchtekh-Profi»

- I. The main activity is development and mass production of educational and lab equipment, and visual aids.
- II. More than 8,200 items of automated laboratory facilities, stands, simulators, emulators, parts cuts, tablets and interactive visual aids, test and program facilities have been developed. About 1,100 of them are high-tech products. Every year 30–50 new samples of innovative training equipment are developed.
- III. Delivery to more than 1,000 universities, technical schools, colleges and vocational training schools, retraining centers at industrial enterprises in Russia and 267 educational entities of Kazakhstan, Belarus, Mongolia, Uzbekistan, Kyrgyzstan, Tajikistan, Turkey and Europe.
- IV. Production capacity of 500–750 million rubles of educational and research products per year.

Compliance with educational standards, modern digital technologies (3D, VR, AR) and design.

Reliability and safety, visibility and informativeness are the principal features of the products of Research and Production Enterprise, Uchtech-profi.

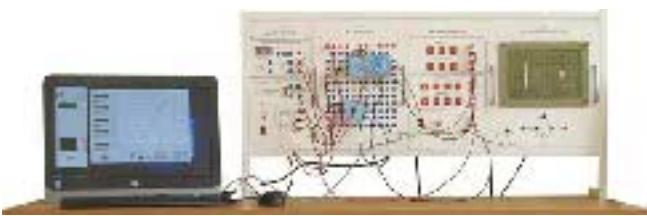

The main customers of educational equipment and visual aids are more than 2,800 federal, national research, state and technical universities, as well as military, mining, railway, construction, aviation, marine, automotive, medical, pedagogical and engineering and economic universities/academies, technical schools, colleges, specialized schools and lyceums, and training centers of industrial enterprises in Russia, Kazakhstan, Uzbekistan, Tajikistan, Kyrgyzstan, Mongolia, Turkey.

PHYSICS

ELECTRICITY AND MAGNETISM

Teaching lab and demonstration equipment

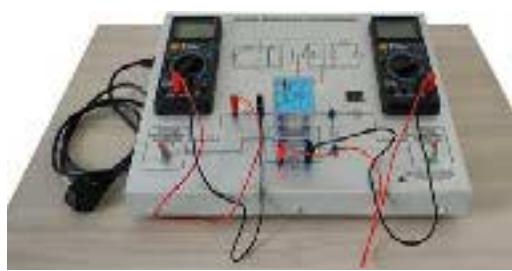

Physics. Electricity and magnetism EiM-K
(18 lab works)

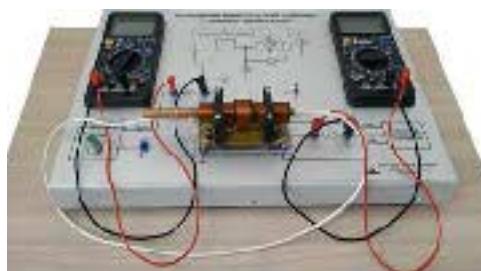

Mutual induction phenomenon EiM-M-L6

Magnetron method for electron charge to mass ratio, EiM-M-L7

Hall effect in semiconductors EiM-M-L12

Solenoid magnetic field with a Hall sensor, EiM-M-L17

Lab stands

- «Typical lab set Physics. Electricity and Magnetism» (18 lab works):
 - EiM-K (computer);
 - EiM-R (manual).
- «Modular lab installations Physics. Electricity and Magnetism» (38 lab works – installations)

Demonstration equipment

- «Demonstration galvanometer» (GD-01)
- «Demonstration ammeter» (AmD-01)
- «Lenz Law»
- «Parallel currents interaction» (F-Dem-DpGN)
- «Electromagnet with adjustable inter-pole magnetic field induction» (F-EIMag-01)
- «Disc coil suspended to a tripod with a flexible conductive suspension»
- «Foucault pendulum with two interchangeable plates» (solid and incised)
- «Manual electromagnetic induction demonstration frame»
- «Ampere power demonstration installation»
- «Permanent magnet with adjustable pole spacing»
- «Engine generator, demonstration electric machine»

Virtual laboratory stands

- Physics. Electricity and magnetism VLS-FEM

Peltier Effect

Helmholtz coils

PHYSICS

MECHANICS

Teaching lab and demonstration equipment

Elastic and inelastic collision of balls

Movement along the Inclined plane

Gyroscopic effect

Oberbeck pendulum

Atwood's machine

Lab stands

- «Elastic collision of bodies»
- «Movement along the Inclined plane»
- «Flywheel»
- «Inelastic collision of physical pendulums»
- «Elastic and inelastic collision of balls»
- «Oberbeck pendulum»
- «Physical pendulum»
- «Ideal pendulum»
- «Maxwell pendulum»
- «Coupled pendulums»
- «Elastic pendulum»
- «Ballistic pendulum»
- «Atwood's machine»

Demonstration equipment

- «Gyroscopic effect»
- «Solid and hollow cylinders, identical in mass and radius, rolling down along an inclined plane»
- «Magic cylinder»
- «Zhukovsky's bench»
- «In-rotation inertia forces»
- «Momentum conservation principle»
- «Closed system demonstration»
- «Free rotation axes»

Virtual laboratory stands

- «Physics and Mechanics VLS-FM»

Maxwell pendulum

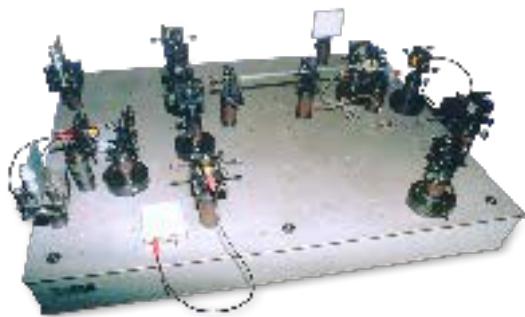

Physics and Mechanics VLS-FM, virtual lab stand

PHYSICS

OPTICS

Teaching lab and demonstration equipment

Holographic installation

Diffraction of light on one- and two-dimensional grids

Geometrical optics laws

External photoelectric effect

Lab stands

- «Light dispersion»
- «Light diffraction» (2 workstations)
- «Interference of light. Newton's Rings»
- «Polarization of light»
- «External photoelectric effect»
- «Geometrical optics laws»
- «Determination of the speed of light»
- «Fresnel equation»

Demonstration equipment

- «Geometrical optics»
- «Young's experiment»
- «Light diffraction at a half-plane and a round hole»
- «Diffraction of light on one- and two-dimensional grids»

Holographic equipment

- «Optical flat plane»
- «A set of mechanical and optical elements mounted on the optical plate»

Virtual laboratory stands

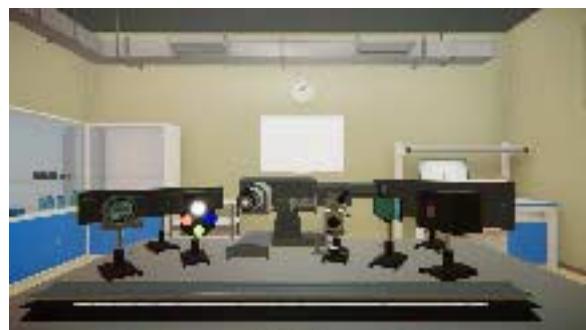

- «Physics – Optics VLS-FO»

Diffraction of light

Polarization of light

Virtual laboratory stand
Physics - Optics VLS-FO

PHYSICS NUCLEAR, QUANTUM AND MOLECULAR PHYSICS

Teaching lab and demonstration equipment

Quantum and nuclear physics

Gas discharge meter

The half-life of a long-lived isotope

Heisenberg's uncertainty principle

Lab stands

- «Gas discharge meter»
- «Poisson's equation»
- «The half-life of a long-lived isotope»
- «Degree of a solid body blackness»
- «Heisenberg's uncertainty principle»

Virtual laboratory workshop
Physics (secondary school)

Molecular physics Lab stands

- «Air viscosity»
- «Determination of the air heat capacities ratio»
- «Liquid surface tension»
- «Linear expansion of solids»
- «Heating-properties of materials»
- «The average free path length and the effective air molecules diameter»
- «Entropy increment during tin melting»
- «Fluid flow velocity according to Pitot and Venturi methods»
- «Thermodynamic parameters in gas mixing»
- «The air thermal conductivity coefficient determined by the hot-thread method»
- «Molecular physics and thermodynamics, virtual lab stand»

Air viscosity

Air heat capacity ratio

Virtual laboratory workshop

- «Molecular physics and thermodynamics, virtual lab stand»
- «Physics, virtual laboratory workshop (secondary school)»
- «Physics, virtual laboratory complex (vocational training and higher education)»

Projector interactive posters sets
and printed classroom posters:

- Physics
- Physics (secondary school)
- Demonstration complexes**
- Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

CHEMISTRY. CHEMICAL INDUSTRY

Study labs and demonstration equipment

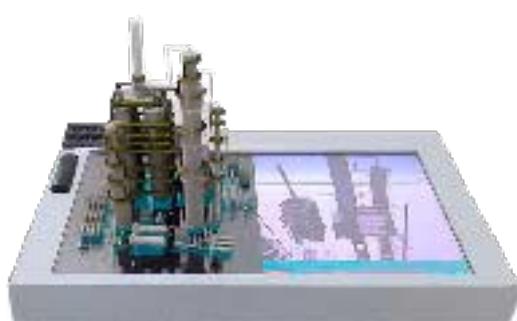

Stoichiometry

Conductometry

Distillation

Complex oil refining plant

- Lab installations**
- «Stoichiometry»
 - «Kinetics»
 - «pH-metrics»
 - «Conductometry»
 - «Thermal effects»
 - «Colorimetry»
 - «Ionometry»
 - «Distillation»
 - «Electrochemistry»

Chemical technology mock-ups

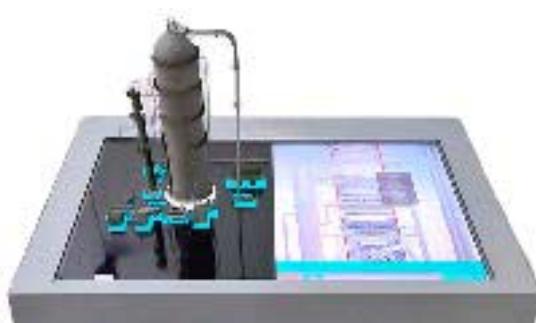

- «Complex oil refining plant»
- «Integrated gas processing plant»
- «Oil and gas storage tank farms»
- «Rectification column»
- «Petroleum products separation»
- «Acids production»
- «Carbamide production»
- «Ammonia production»

Water chemistry lab complexes

- «Multi-stage filtering»
- «Deep oxidation»
- «Coagulation and flocculation»
- «Adsorption and ion exchange»
- «Cleaning with biofilms»
- «Activated sludge cleaning»

Technological processes of chemical production

- «Rectification process»
- «Chemical production technological processes automation»
- «Gas constant determination»
- «Air dustiness determination»
- «Vaporization processes»
- «Drying of materials»
- «Heat exchangers»
- «Absorption process»
- «Extraction process»
- «Determination of bulk material solid and bulk density»
- «Separation process»
- «Vacuum cooling and phase transitions processes»
- «Solids heat capacity»

Rectification column

Solids heat capacity

Absorption process

Virtual training complex
Petroleum products separation

Virtual training complex
Oil refining

Virtual training complex
Petroleum products separation

Virtual training complex
Petroleum products separation

Virtual training complex
Technological features of a gasoline
redistillation unit

Fertilizer production

Sulfuric acid production

Plastic production

Nitric acid production

Oil refining

Phosphoric acid production

Carbamide production

Rubber production

Ammonia production

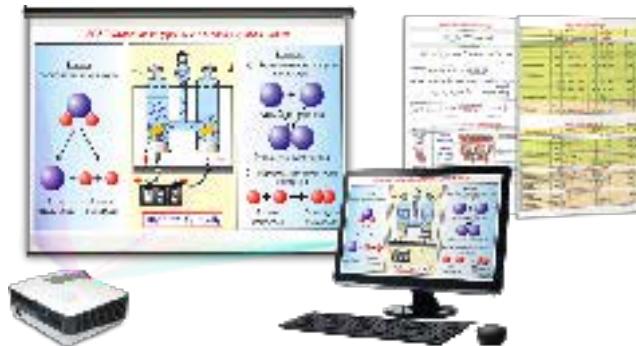

Interactive demonstrations**D. Mendeleev's Periodic Table**

- Sound
- Video
- Testing system
- Individual sectional RGB lighting
- Real chemical elements samples
- Control terminal with built-in software

**Virtual laboratory works and training complexes.
Chemical technologies****Chemistry classrooms**

The maximum chemistry classroom equipment set includes the following:

- «A set of virtual laboratory works» (170+ training workshops)
- «A set of VR laboratory works» (40+ training simulations)
- «Computer equipment» (8 student sets + 1 teacher set)
- «VR equipment» (3 sets)
- «A standard physical chemistry equipment set»
- «A set of standard colloidal chemistry equipment set»
- «A standard general chemistry equipment set»
- «A set of laboratory installations» (9+ installations for various experiments)
- «Interactive whiteboard which allows demonstrating virtual chemical works»
- «Interactive Mendeleev's Periodic Table»

**Virtual laboratory works and training complexes.
General chemistry****Training and methodological complexes (didactic software, electronic and printed posters, laptop, projector):**

- Chemistry
- Radiation reconnaissance and control equipment (LP-DP-5V)
- General chemistry
- Chemical kinetics
- Chemical thermodynamics
- Water Chemistry
- Oil and gas chemistry
- Chemical technologies
- Chemical production
- Substances and their compounds
- Analytical Chemistry
- Biochemistry

TECHNICAL DRAWING. DESCRIPTIVE GEOMETRY. ENGINEERING DRAWING

Study labs and demonstration equipment

Hydraulic lock

- «Engineering graphics and descriptive geometry with an assembly drawing tasks album»
- «Engineering graphics 1. Hydraulic lock»
- «Engineering graphics 2. Check valve»
- «Engineering graphics 3. Gear – shaft connection»
- «Engineering graphics 4. Assembled ICE connecting rod»
- «Engineering graphics 5. Hub with bearing»
- «Engineering graphics 6. Tension roller»
- «Engineering graphics 7. Springs»
- «Engineering graphics 8. Thread types»
- «Engineering graphics 9. Measuring linear dimensions on a cylindrical part»
- «Engineering graphics 10. Measuring linear dimensions on a flat part»
- «Engineering graphics 11. Cylindrical parts with cutouts»

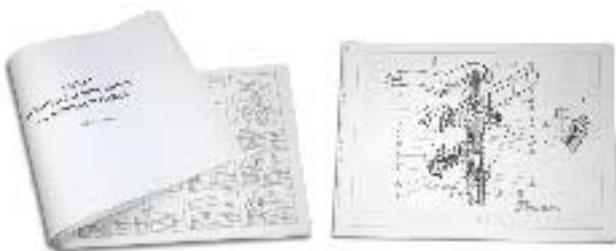

Engineering graphics 2. Check valve

Gear – shaft connection

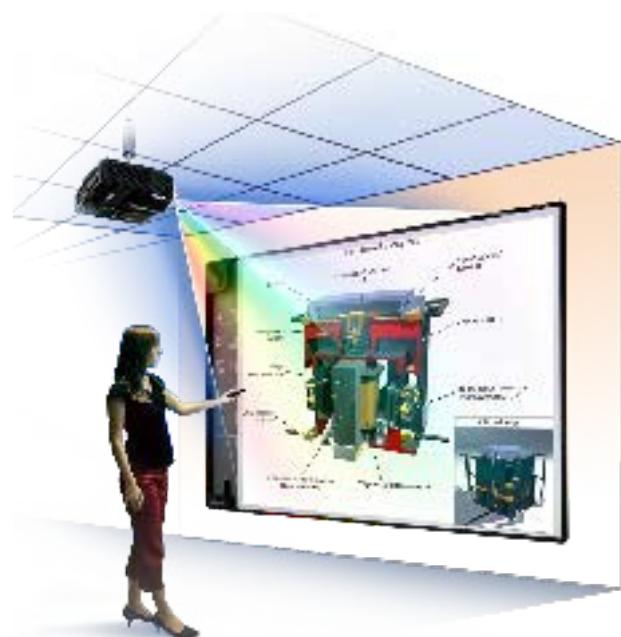

Thread types

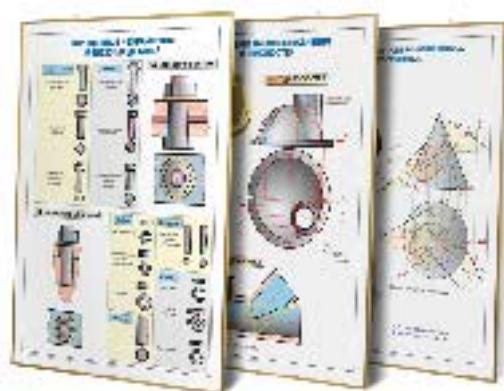

Assembly drawings tasks album

Hub with bearing

Assembled ICE connecting rod

Tension roller

Interactive manuals (CD) and classroom posters

- Engineering drawing
 - Engineering drawing
 - Descriptive geometry
 - Demonstration complexes
- Basic equipment:** projector, screen or interactive whiteboard, laptop, pre-installed set of electronic posters.

STRENGTH OF MATERIALS. CONSTRUCTION MECHANICS

Study labs and demonstration equipment

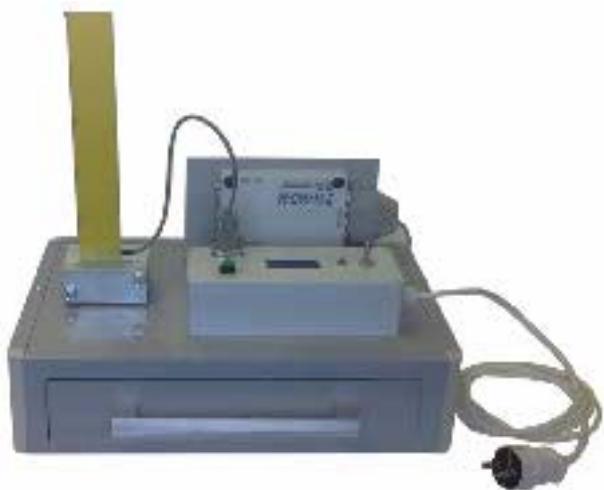

Rods and beams

- «Mechanical properties of materials»
- «Mechanical testing of materials» (MIM-7LR-010)
- «Fundamentals of materials resistance» (OSM-8LR-09)
- «Fundamentals of materials resistance» (OSM-9LR-09)
- «Fundamentals of materials resistance» (OSM-11LR-11)
- «Rods and beams» (SM-SIB-7LR-010)
- «General bent rod stability»
- «Longitudinally compressed rod stability»
- «Composite materials testing» (IKM-010-4LR)
- «Model of the industrial building load-bearing structures» (MKPZ-7LR-11)
- «Plate girder stresses»
- «Vibrations of truss structures»
- «Wave dynamics»
- «Calculating elastic constants under tension»
- «Calculating elastic modulus under torsion»
- «Bending center identification»
- «Calculating main stresses»
- «Calculating displacements during beam bending»
- «Oblique beam bending»
- «Calculating stresses under simple bending»
- «Longitudinally compressed rod stability»
- «Moving in a flat frame»

Longitudinally compressed rod stability

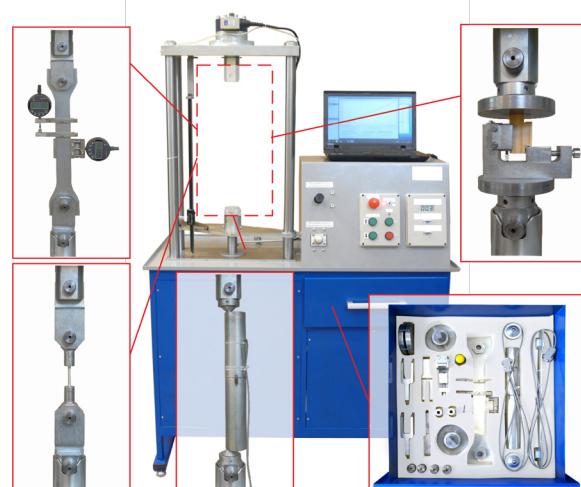

Composite materials testing

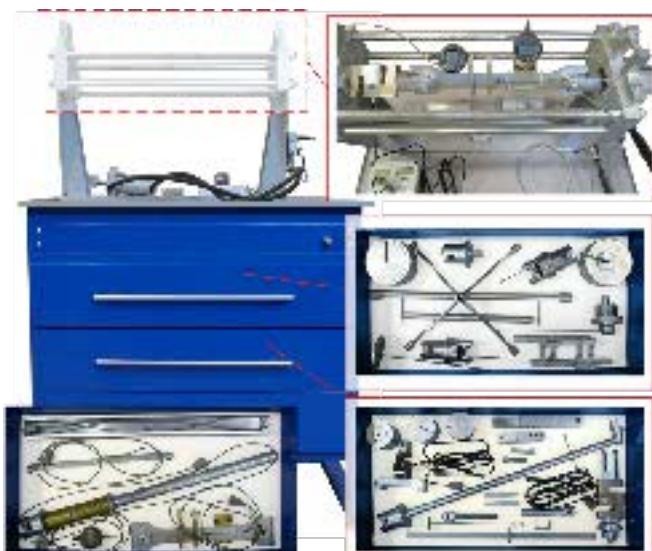

Mechanical properties of materials

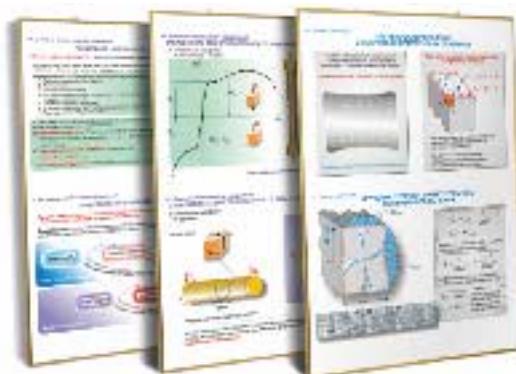

Wave dynamics

Mechanical testing of materials

Fundamentals of material resistance

Industrial building load-bearing structures model

**Interactive manuals (CD) and classroom posters**

- Engineering drawing
- Machine parts and design basics
- Strength of materials
- Technical mechanics
- Construction materials technology
- Pressure metal forming machines and technologies
- Fundamentals of cutting theory and tools

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

MACHINE PARTS. DESIGN BASICS

Study labs and demonstration equipment

Industrial mechanics and installation

Machine parts – friction in threaded connections

Machine parts – safety couplings

Machine – chain transmissions

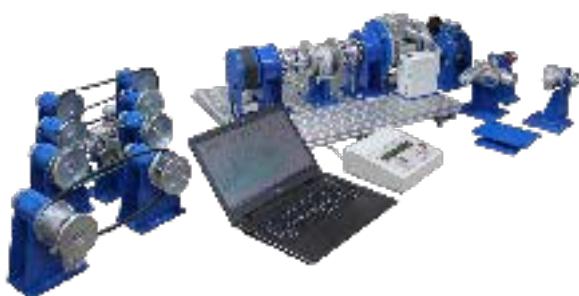

Machine parts – parallel-shaft reduction gear unit

Training stands

- «Machine parts – mechanical transmissions»
- «Machine parts – gear transmissions»
- «Machine parts – belt transmissions»
- «Mechanical connections»
- «Machine parts – pressure couplings» (DM-CH-010-3LR)
- «Machine parts – opening of the threaded joint» (DM-RSRS-010-3LR)
- «Machine parts – friction in threaded connections» (DM-TR-010-2LR)
- «Continuous involute tooth formation»
- «General industrial gearboxes»
- «Machine parts – worm gear» (DM-RF-010-4LR)
- «Machine parts – bevel gear speed reducer» (DM-RK-010-4LR)
- «Machine parts – parallel-shaft reduction gear unit» (DM-RC-010-4LR)
- «Machine parts – planetary reduction gear» (DM-RP-010-4LR)
- «Machine parts - chain transmission» (DM-PC-010-3LR)
- «Operation and maintenance of industrial electromechanical drives»
- «Characteristics of coiled compression and tension springs» (DM-PR-010-2LR)
- «Machine parts – coupling fuse» (DM-MP-010-3LR)
- «Machine parts – shoe brake assembly» (DI-TK-010-2LR)
- «Machine parts – friction bearings» (DM-PS-010-4LR)
- «Machine parts – shaft resonance» (DM-RV-010-3LR)
- «Pressure distribution in a hydrodynamic bearing»
- «Dry friction»
- «Rolling bearings»
- «Gear defects testing»
- «Engineering graphics» (Gear-shaft connection, Springs, Thread types, ICE connecting rod assembly, Hub with bearing, Tensioning roller)
- «A set of mechanism models on a stand» (20 pcs.)
- «Working processes of a chain/belt conveyor, winch»
- «Screw pair study»
- «General industrial gearboxes»
- «Shaft supports»

A set of standard boards with real samples of parts and assemblies for the "Machine Parts" course

- «Worm gear»
- «Parallel-shaft reduction gear unit»
- «Bevel gear speed reducer»
- «Disk-type variable-speed friction drive unit»
- «Cogged belts»
- «V-belts»
- «Flat and round belts»
- «Bearings»
- «Chains»
- «Conveyor belts»
- «Welded joints»

Working processes in mechanical transmissions

- «Threaded connections»
- «Riveted joints»
- «Threaded connections locking methods»
- «Bolts and screws, Nuts and plates»
- «Machines mounting means»
- «Shafts and axles»
- «Planetary reduction gear»
- «Springs»
- «Elastic couplings»
- «Compensating couplings»
- «Safety couplings»
- «Movable couplings»
- «Permanent couplings»

Teaching & methodical literature and manuals

- «Reduction Gears Part 1»
- «Reduction Gears Part 2»
- «Drive belts and chains»
- «Conveyor systems»
- «Computer 1 – aided recirculating transmission design»
- «Machine parts and design basics»

Operation and maintenance of industrial electromechanical drives

Machine parts – mechanical transmissions

Rolling bearings

Mechanical connections

**Interactive manuals (CD) and classroom posters**

- Machine parts and design basics
- Engineering drawing
- Technical mechanics
- Theory of mechanisms and vehicles

Demonstration complexes

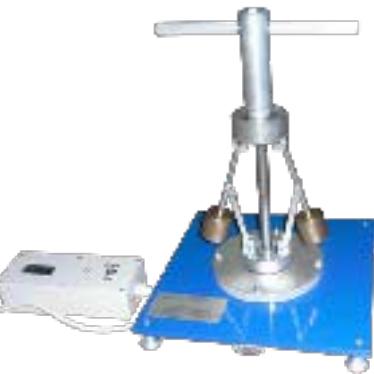

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

A set of mechanism models on a stand (20 pcs.)

THEORETICAL, TECHNICAL AND APPLIED MECHANICS

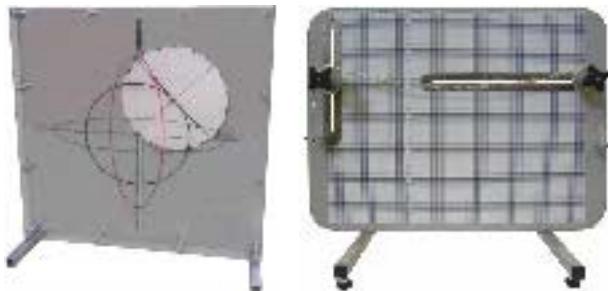

Study labs and demonstration equipment

Maintaining axial kinetic moment

Gyroscopic effects

Ellipsograph

Building a catenary line

Calculating main stresses

Sliding and static friction

Theoretical and technical mechanics

Training stands

- «Gyroscopic effects»
- «Instantaneous rotation axis»
- «Maintaining axial kinetic moment»
- «Ellipsograph»

Demonstration models

- «Natural trihedron»
- «Euler Angles»
- «Turning pair»

Training stands

- «Building a catenary line»
- «Stress distribution in plate girders»

Experimental installations

- «Calculating elastic constants under tension»
- «Calculating elastic modulus under torsion»
- «Bending center identification»
- «Calculating main stresses»
- «Calculating displacements during beam bending»
- «Oblique beam bending»
- «Calculating stresses under simple bending»
- «Longitudinally compressed rod stability»
- «Moving in a flat frame»
- «Mechanisms demonstration models set» (TM-012-14MD)

Standard training equipment set for the "Technical Mechanics" course (TMKM-12M)

Demonstration models

- «Demonstration of the stress concentration effect and the Saint-Venant principle» (TMKM1)
- «Determining the form of stability loss depending on the fixation» (TMKM2)
- «Elastic deformation of cylindrical compression springs» (TMKM3)
- «Flexible rods stability under compression» (TMKM4)
- «Flat shapes gravity center» (TMKM5)

Lab stand

- «Converging forces coplanar system» (TMKM6)
- «Shaping teeth in machine clamps» (TMKM7)
- «Coplanar system of arbitrarily arranged forces» (TMKM8)

Demonstration models

- «Sliding and static friction» (TMKM9)
- «Worm gear» (TMKM10)
- «Parallel-shaft reduction gear unit» (TMKM11)
- «Girder elements stability demonstration» (TMKM12)

Theory of machines and mechanisms

- «Standard teaching aids set»
- «Continuous involute tooth formation»
- «Crank-rocker mechanism efficiency coefficient» (TMM-KKM-013-ZLR-01)
- «Cam gear» (TMM-ISH-013-5LR-01)
- «Identifying inertia moments based on a single-thread suspension method»

Worm gear

Parallel-shaft reduction gear unit

Determining beam reactions

Coplanar system of arbitrarily arranged forces

Mechanisms demonstration models set

- «Structural analysis of mechanisms and machines, models set» (CA-TMM-01/14)
- «Metric synthesis of the crank-slider mechanism» (MS-TMM-01)
- «Metric synthesis of a four-hinged mechanism» (MS-TMM-02)
- «Determining mechanism efficiency» (LC-TMM-01)
- «Modeling the process of teeth shaping in the machine engagement» (LS-TMM-2)
- «Rotor dynamic balancing» (LS-TMM-3)
- «Cam gear» (LC-TMM-4)

Standard equipment set for the course "Applied Mechanics" PM/TM:

- «Coplanar converging forces system» (PM/TM-1TRM)
- «Coplanar system of arbitrarily arranged forces» (PM/TM-2 TRM)
- «Determining beam reactions» (PMDM-3 TRM)
- «Planar figure gravity center» (PMDM-4TMM)
- «Balancing rotation bodies» (PM/TM-5 T MM)
- «Determining the shear modulus during torsion» (PM/TM-6CM)
- «Linear and angular displacements of a statically definable beam» (PM/TM-7 CM)
- «Beam displacements at biaxial bending» (Tm/TM-8CM)
- «Stress-strain state under torsion and joint action of bending and torsion» (PMDM-9 CM)
- «Measurement of critical force for a compressed rod of great flexibility» (PM/TM-10 CM)
- «Mechanisms demonstration models set for the course "Applied Mechanics"» (40 pcs.)

Interactive manuals (CD) and classroom posters

- Theoretical mechanics
- Technical mechanics
- Theory of mechanisms and vehicles
- Machine parts and design basics
- Engineering drawing
- Strength of materials

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

HEAT ENGINEERING AND THERMODYNAMICS

Study labs and demonstration equipment

Gas heating engineering

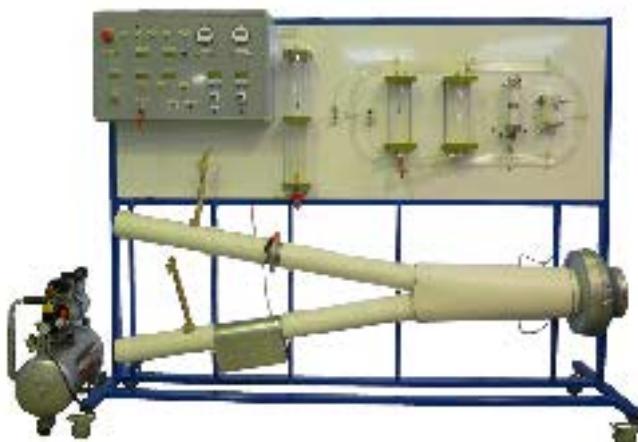

- «Joule's experiment»
- «Technical thermogasdynamics» (TET-GAS) (TTGD-011-05LR-01)
- «Thermodynamic cycles of piston machines» (TCPM-011-05LR-01)
- «Gas Heat Engineering» (TPG-010-5LR-01)
- «Heat transfer during convection and blowing» (TPK-010-9LR-01)
- «Fluid heat engineering» (TPJ-010-6LR-01)
- «Cryogenic and refrigeration equipment» (KHT-SK)
- «Thermal and hydraulic characteristics of heating devices» (TGHPTO-9LR-010)
- «Heat supply and heating devices»
- «Investigation of thermal radiation impact on various materials» (OPTP-01)
- «Fourier's Law»
- «Microclimate control»
- «Automation of heat & gas supply and ventilation systems» (ATGSV-09-11LR-01)
- «Application of automation and dispatching tools in heating units of district heating systems of buildings»
- «Heat pump-1»
- «Heat pump-2»
- «Heat pump using geothermal low-potential energy» (based on heat pumps)
- «Renewable energy sources. Solar collector»
- «Automated liquid and gaseous fuel boiler house» (AK-1)
- «Automated heating unit» (ATP-01)
- «Indirect automated heating system» (ASO-03)

Fluid heat engineering

Automated heating unit

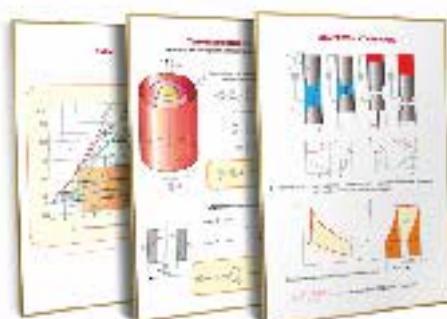

Technical thermogasdynamics

Thermodynamic cycles of reciprocating machines

Heat transfer during convection and blowing

Cryogenic and refrigeration equipment

**Interactive manuals (CD) and classroom posters**

- Technical thermodynamics
- Heat and mass transfer
- Heat and gas supply and ventilation

Demonstration complexes

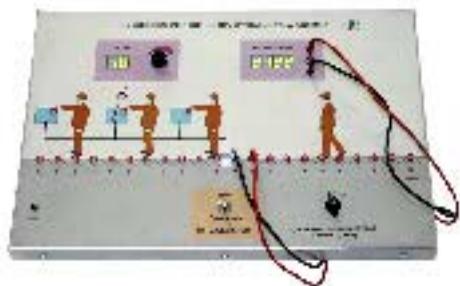

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed set of electronic posters.

Heat pump

HEALTH & SAFETY. ELECTRICAL SAFETY

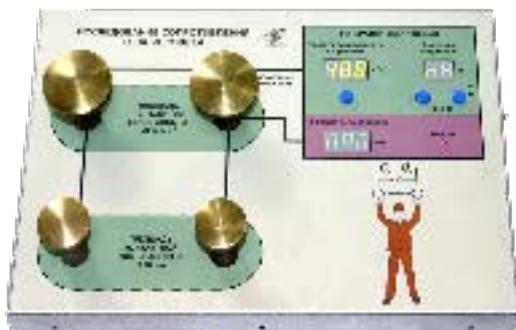

Study labs and demonstration equipment

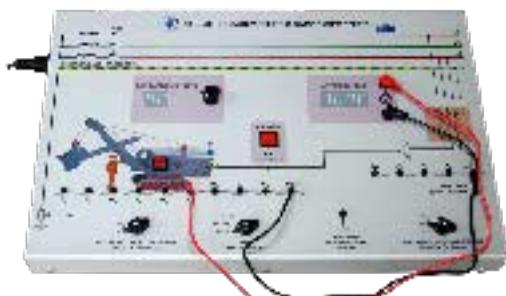

Phenomena associated with current grounding

Electrical safety in three-phase AC networks with insulated and grounded neutral

Human body resistance research

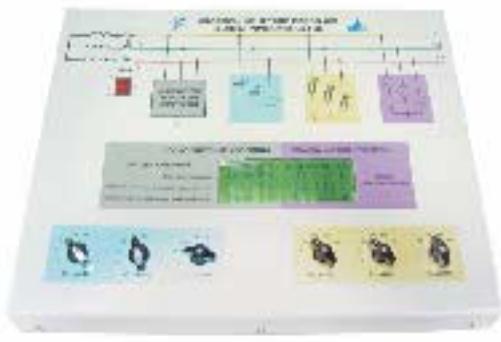

Protective grounding and self-grounding

Electrical safety

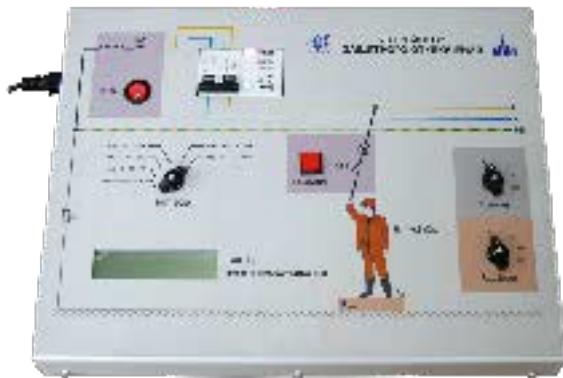

- «Fundamentals of Electrical Safety» (OEB-NI), (OEB-SI)
- «Electrical safety in three-phase AC networks with grounded neutral» (BZhD-01)
- «Electrical safety in three-phase AC networks with insulated neutral» (BZhD-02)
- «Electrical safety in three-phase AC networks with insulated and grounded neutral» (BZhD-01/02)
- «Phenomena associated with current grounding» (BZhD-03)
- «Human Body Resistance Research» (BZhD-04)
- «Protective grounding and self-grounding» (BZhD-05)
- «Protective grounding and neutral grounding» (BZhD-06)
- «Protective grounding and electrical safety protective measures» (ZiZME-NR), (ZiZME-SR)
- «Electrical safety in power supply systems» (BZhD-06/2)
- «Electrical safety in the units up to 1,000 V» (BZhD-06/3)
- «Protective shutdown devices» (BZhD-07)
- «Electrical safety in residential and office premises» (BZhD-08)
- «Electrical safety in residential and office premises» (EBJiOP-NR), (EBJiOP-SR)

- «Methods of insulation control in electric networks» (BZhD-13)
- «Electrical safety in the units up to 1,000 V» (EBU100-NI), (EBU 100-SI)
- «Health & safety»
- «Light sources efficiency and quality» (BZhD-09)
- «UV-radiation protection» (BZhD-10)
- «Laser radiation protection» (BZhD-11)
- «Investigation of the methods of protection against thermal radiation» (BZhD-14)
- «Research of protection methods against industrial vibration» (BZhD-15)
- «Investigation of protection methods against occupational noise» (BZhD-16)
- «Wastewater treatment»

Laser radiation protection

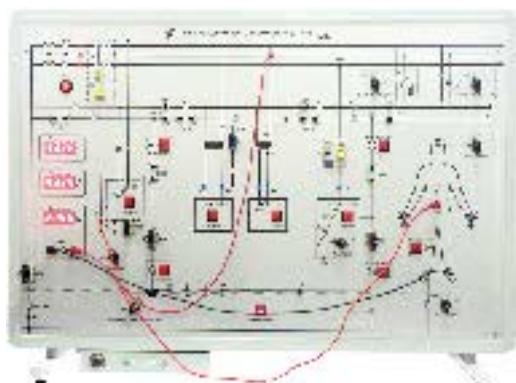

Methods of insulation control in electric networks

Protective shutdown devices

Light sources efficiency and quality

Electrical safety in the units up to 1,000 V

Research of protection methods against industrial vibration

Investigation of protection methods against occupational noise

Interactive manuals (CD) and classroom posters

- Industrial & occupational health & safety
- Civil defense and emergency situations
- Metal-cutting machines safety
- Ecology for engineers

Training and methodical complex

Basic equipment: projector, screen, laptop, pre-installed set of interactive posters, virtual laboratory, classroom posters.

FIRE SAFETY

Simulator complex for the use of emergency fire-fighting appliance

- Fire safety**
- «Electric installation and commissioning of fire and security alarm EiNOPS-01»
 - «Simulator complex for the use of emergency fire-fighting means»
 - «Personal Protective Equipment, sample board»
 - «Fire pump operating processes, lab stand»

Training stands

- «Extinguishing media. Fire extinguishers»
- «Gas masks»
- «Fire pump»

LED-dynamic stands

- «Breathing apparatuses»
- «Fire truck»
- «Fire truck ladder»

Electric installation and commissioning of fire and security alarm

Extinguishing media. Fire extinguishers

Fire pump operating processes

PPE, sample board

Gas masks, training stand

Electric installation and commissioning of security and fire alarms

Application of emergency fire-fighting means (LP-BZH-P01)

Fire Pump, training stand

Equipping evacuation routes with fire safety means (LP-BZH-P02)

Fire pumps, virtual simulator

**Training and methodological complexes (didactic software, electronic and printed posters, laptop, projector):**

- Occupational health & safety
- Civil defense and emergency situations

ELECTRICAL ENGINEERING AND THE BASICS OF ELECTRONICS. ELECTROMECHANICS. ELECTRIC CIRCUITS

Study labs and demonstration equipment

Electric circuits (EC-MR)

Theoretical foundations of electrical engineering (TOE-NR)

Theoretical foundations of electrical engineering (TOE-SK)

Theoretical foundations of electrical engineering (TOEZ-MR)

electric circuits and the basics of electronics (TECiOE4-NRM)

Electric circuits

Microcontrollers and microprocessor devices

Microcontrollers

**Interactive manuals (CD) and classroom posters**

- Technological processes and
 - Interfaces of peripheral devices. Microcontrollers
- Demonstration complexes**

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Field-programmable gate array (FPGA)

INSTALLATION, COMMISSIONING AND REPAIR OF ELECTRICAL EQUIPMENT, DRIVES AND INSTRUMENTATION AND CONTROL

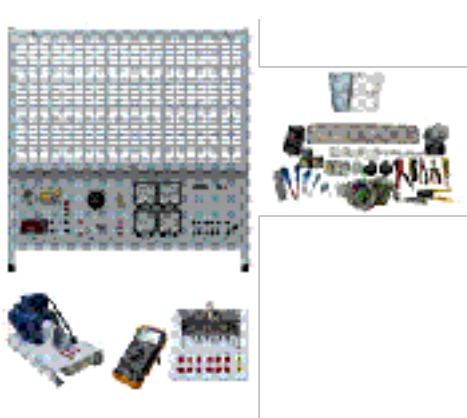

Study labs and demonstration equipment

Instrumentation and control assembling fitter, desktop version, mounting panel (SpKIPiA-NMP)

Stand for the training of wiremen and electricians with a measuring unit, desktop version, power supply voltage 380V/220V (SPEI/380-NMP) (SPEI/220-NMP)

Installation and commissioning of electric circuits of electric motors and automation, desktop version, mounting panel (MNECA-NMP)

Electrical installation tables

- «Electric motor fault simulator» (INAD)
- «Electrical installation table (desktop version, mounting panel) power supply voltage 220V/380V» (EMC/220-NMP) (EMC/380-NMP)

Work stations of wiremen and electricians

- «Instrumentation and control assembling fitter, desktop version, mounting panel» (SpKIPiA-NMP)
- «Electrical installation, troubleshooting and repair of instrumentation systems, desktop version, mounting panel» (EPRsKIPiA-NMP)
- «Electrician workstation» (RME-NI)
- «Workstation for SKB in the field of electrical engineering, automation and electronics, stand version, power supply voltage 220V/380V» (RMSKBETA/220-SI) (RMSKBA380-SI)
- «Stand for the training of electricians and wiremen, desktop version, mounting panel, power supply voltage 220V/380V» (SPEE/380-NMP) (SPEE/220-NMP)
- «Stand for the training of electricians and wiremen with low-voltage control, desktop version, mounting panel, power supply voltage 380V/220V» (SPEN/380-NMP) (SPEN/220-NMP)
- «Stand for the training of electricians and wiremen with a measuring unit, desktop version, mounting panel, power supply voltage 380V/220V» (SPEI/380-NMP) (SPEI/220-NMP)
- «Electrical installation stand for hidden and open wiring mounting, desktop version, mounting panel, power supply voltage 380V» (EMSP/380-NMP)
- «Workstation of the household appliances and electronics repairman» (RMMpRBT)

Workstations of radio installers

- «Radio installer's workstation, stand version, standard» (RMR-SI-standard)
- «Radio installer's workstation, stand design, standard plus» (RMR-SI-standard plus)

Installation, commissioning and repair of electrical equipment and cabling systems

- «Installation and commissioning of electric circuits of electric motors and automation, desktop version, mounting panel» (MNECA-NMP)
- «Installation and commissioning of electrical equipment at the companies and civil structures, desktop version» (MNE-NI)
- «Fundamentals of electrical installation of electrical devices, desktop version, mounting panel (OEEA-NMP)
- «Electrical installation in residential and office premises, desktop version» (EMOP-NI)
- «Structured cabling systems» (SKS)
- «Method of searching for hidden wiring EM-MPSP»

Installation, commissioning and repair of relay-contactor control systems of electric motors

- «DC motor control» (monoblock manual version) (RKS-DPT-MR)

Installation and commissioning of electrical units up to 1,000 V in power supply systems, desktop version (MNEdo1,000V-NI)

Functioning injection engine VAZ-21067

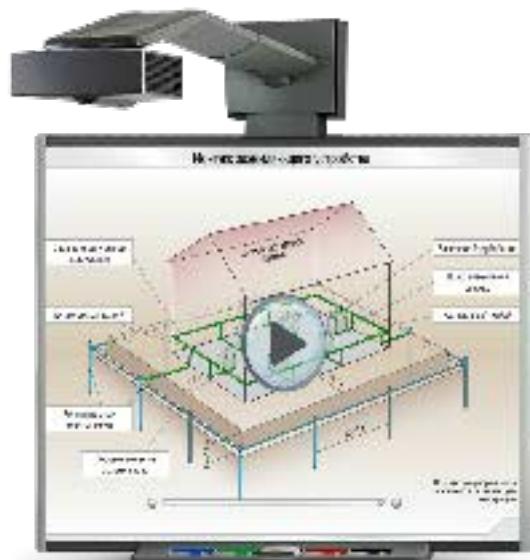

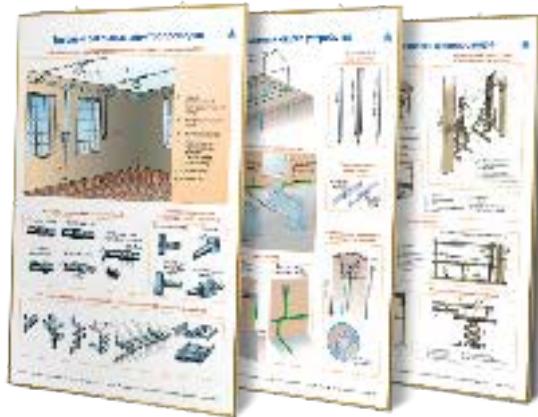

- «DC motor control» (monoblock manual version with an oscilloscope) (RKS-DPT-MRC)
- «Asynchronous motor control» (desktop manual version) (RKS-AD-NR)
- «Asynchronous motor control» (desktop manual version with an oscilloscope) (RKS-AD-NRC)
- «Control of asynchronous motor with phase rotor and synchronous motor» (manual desktop version) (RKS-ADFR-NR)
- «Control of asynchronous motor with phase rotor and synchronous motor» (desktop manual version with an oscilloscope) (RKS-ADFR-NRC)
- «Detecting electric motors flaws EM-IDE»
- «Testing start-up protection equipment and control equipment for suitability EM-PPAAU»

Electrical safety (Installation and commissioning)

- «Installation and commissioning of electrical units up to 1,000 V in power supply systems, desktop version» (MNEdo1000V-NI)
- Security and fire alarm system (EiNOPS-01)

Installation, commissioning and repair of internal combustion engines

- Functioning carburetor ICE VAZ-21067
- Functioning injection engine VAZ-21067
- Functioning injection engine VAZ-2115

Interactive manuals (CD) and classroom posters

- Installation and operation of electrical equipment
- Power supply of industrial and residential buildings
- Operation of power grids and station and substation equipment

Transmission and quality of electrical energy in power supply systems (PiKEE-NN)

Relay protection (RZ-NN)

Study of the power transmission line OL and SIP EM-VLSIP

Measuring voltage transformer EOSP-ITN

Automatic circuit breakers up to 1,000 V (EOSP-AV1000)

Load switches and fuses above 1,000 V (EOSP-P-VNiP)

Outdoor installation disconnector EOSP-P-RNU

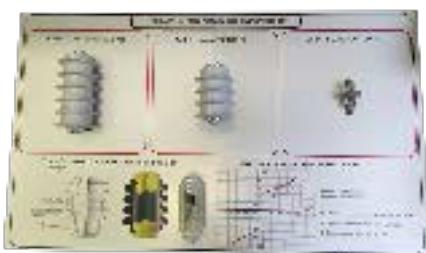

Testing start-up protection equipment and control equipment for suitability EM-PPAAU

- «Reactive power compensation in power supply systems» (manual desktop version) (KRM-NR)

Measuring current transformer EOSP-ITT

Surge arresters EOSP-P-OP

Interactive manuals (CD) and classroom posters

- Power industry Relay protection. Power supply. Energy and resource-saving technologies
- Operation of electric networks and the equipment of stations and substations
- Electrical substations
- Relay protection basics
- Electrical engineering materials
- Electrical devices
- Electric machines
- Electrical equipment of industrial and residential buildings
- Installation and commissioning of electrical equipment for industrial and residential buildings
- Computer networks
- Telecommunications
- Interfaces of peripheral devices. Microcontrollers

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

ALTERNATIVE AND RENEWABLE ENERGY SOURCES

Study labs and demonstration equipment

Solar collector

Heat pump using geothermal low-potential energy

Solar photovoltaic system (SFES-NR)

Mock-up of a hydro power station

Geothermal energy

- «Heat pump using geothermal low-potential energy «(based on heat pumps)

Solar energy

- «Solar photovoltaic system» (desktop manual version) (SFES-NR)
- «Renewable energy sources. Solar collector» (SK-SK)
- «Solar collector, VLS»

Wind power

- «Wind power system based on a synchronous generator» (desktop version with a laptop) (VES-SG-NN)
- «Renewable energy sources. Wind generator» (VIE-VG-SR)
- «Wind power system based on an asynchronous generator operating in the network (desktop version with a laptop) (VES-AG-NN)
- «Wind power system» (monoblock manual version) (VES-MR)
- «Model of a vertical-axial wind power plant»
- «Wind power system, VLS»
- «Design and the principle of operation of a wind plant, VLS»

Hydropower

- «Operating processes of microHPP of various types» (RP-MGES-017-6LR)
- «Hydropower – turbine-generator system» (GSTG-010-10LR)
- «Hydropower – Pelton turbine-generator» (GSTG-010-5LR)
- «Hydropower – axial turbine-generator system» (GSTG-010-4LR)
- «Hydropower – radial-axial turbine – generator system» (GROTG-010-4LR)
- «Mock-up of a hydro power station»

Geothermal energy

- «Geothermal energy systems, VLS»
- «Configuration and principles of operation of a geothermal heat pump, VLS»
- «Configuration and principle of operation of geothermal collectors, VLS»

Wind power

- «Wind power system, VLS»
- «Design and the principle of operation of a wind plant, VLS»

Electric energy storages

- «Technologies and equipment for the production of electric energy storages, VLS» (VUK-TOPNEK)
- «Fuel batteries, VLS»
- «Energy conversion systems, VLS»
- «Energy accumulation, VLS»
- «Methanol fuel cell, VLS»

Wind power system (VES-MR)

Renewable energy sources.
Solar collector (SK-SK)

Wind power system based on an asynchronous generator operating in the grid (VES-AG-NN)

Operating processes of micro hydroelectric power plants of various types (RP-MGES-017-6LR)

Virtual training complexes on hydropower

**Interactive manuals (CD) and Classroom posters**

- Unconventional and renewable energy sources
- Heat engineering
- Technical thermodynamics
- Heat and mass transfer
- Hydraulics and hydraulic drives
- Electrical engineering
- Electrical measurements
- Electrical engineering materials
- Electric machines
- Installation and operation of electrical equipment
- Operation of electric networks and the equipment of stations and substations
- Power supply of industrial and residential buildings (107)

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Model of a vertical-axial wind power plant

Biogas and biodiesel engines

- «Biodiesel engine»
- «Model of a biogas plant»
- «Biogas power engineering, VLS»

Virtual training complexes on hydropower

- «Hydroelectric power station»
- «Simulator for a hydrogenerator equipment field operator»
- «Features and configuration of hydrogenerators»
- «Circuit engineering and HPP equipment»
- «Hydrogenerator installations»
- «Microhydroelectric power plant»

NUCLEAR AND HYDROGEN POWER

Study labs and demonstration equipment

Circuit engineering and equipment of nuclear power plants

VVER-1000 reactor configuration

- «Design and features of a turbine set for nuclear power plants»
- «Configuration of the NPP steam generator set»
- «Features of the NPP fuel unloading device»
- «Thermonuclear reactor configuration»
- «Circuit engineering and NPP equipment»
- «Configuration of the VVER-1000 reactor»
- «GNC-195 NPP pump configuration»
- «Turbine department of NPP Logistics NPP»
- «Interactive NPP model»

- «Repair and charging of a household refrigerator»
- «Split model for a refrigeration equipment compressor»
- «Assembly and disassembly of a compressor

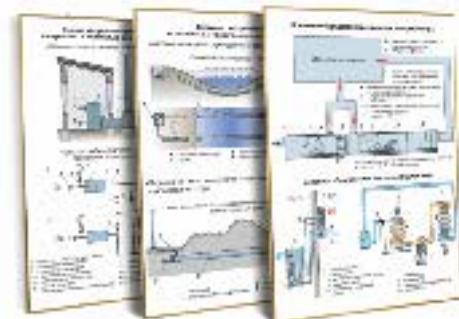

Autonomous automated heating system

Ventilation systems (VENT-017-16LR)

Automation of heat & gas supply and ventilation systems
(ATGSV-09-11LR-01)

Automated solid fuel boiler house (AK-T-02)

Refrigerator-1

Cryogenic and refrigeration equipment (KKhT-SK-017-6LR)

Interactive manuals (CD) and classroom posters

- Heat and gas supply and ventilation
- Heat engineering
- Technical thermodynamics
- Heat and mass transfer
- Operation of gas distribution and gas consumption systems
- Industrial & occupational health & safety.

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

LIGHTING

Study labs and demonstration equipment

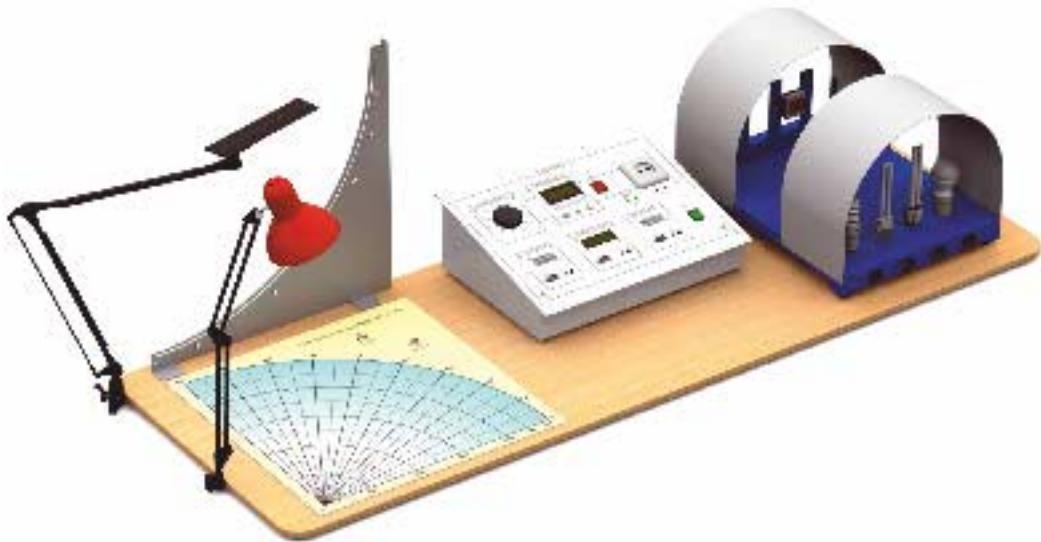

- «Fundamentals of lighting engineering» (manual monoblock version) (OST-MR)
- «Fundamentals of lighting engineering – light sources and lamps» (manual monoblock version) (OST-IS-MR)
- «Fundamentals of lighting engineering – lightning sources and lamps» (manual desktop version) (OST-IS-NR)
- «Lighting engineering – light sources, efficiency and energy saving» (manual desktop version) (ST-IE-NR)
- «Lighting engineering – light sources and lamps, efficiency and energy saving» (manual desktop version) (ST-ISE-NR)
- «Lighting engineering – light sources and lamps, efficiency and energy saving» (manual stand version) (ST-ISE-NR)
- «Efficiency and quality of light sources (BZhD-09)
- «Efficiency and quality of industrial lighting»
- «Lighting engineering – light sources and lamps, efficiency and energy saving» (stand version with a laptop) (ST-ISE-SN)

Lighting engineering – light sources and fixtures, efficiency and energy saving (ST-ISE-SN)

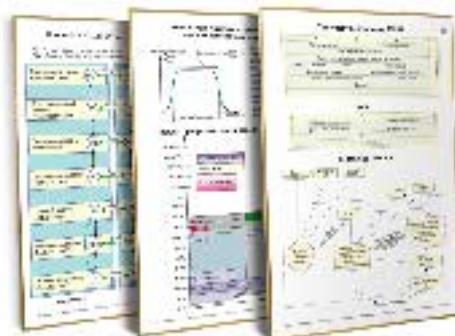

Fundamentals of lighting engineering - light sources and lamps (manual desktop version) (OST-IS-NR)

Fundamentals of lighting engineering - light sources and lamps (manual monoblock version) (OST-IS-MR)

Light sources efficiency and quality (BZhD-09)

Lighting engineering – light sources, efficiency and energy saving

Interactive manuals (CD) and classroom posters

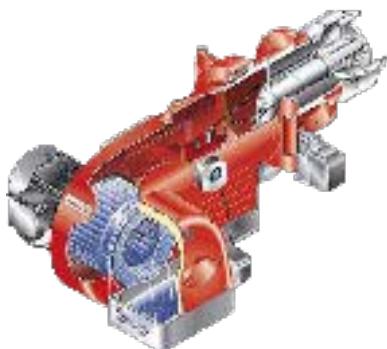

- Electrical devices
- Power supply of industrial and residential buildings (107)
- Electrical engineering. DC electric circuits
- Industrial & occupational health & safety.

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

GAS SUPPLY

Study labs and demonstration equipment

Gas burner

Boiler house, dynamically lit sample board

Operating processes of gas distribution point, lab stand

Gas control point cabinet with one reduction line and bypass, training stand

Heat and gas supply

- «Automated gaseous fuel boiler house»
- «Boiler house, dynamically lit sample board»

Gas distribution systems

- «Operating processes of gas distribution point, lab stand»
- «Gas control point cabinet with one reduction line and bypass, training stand»
- «Gas distribution point, dynamically lit sample board»
- «City gas supply system, dynamically lit sample board»
- «Installation of gas distribution network equipment, training stand»

Gas burners

- «Gas burner, slit-type device»
- «Operation of gas supply systems»
- «Measuring complex, lab stand»
- «Gas pollution control system, training stand»
- «Gas leaks identification»

Pipe fittings

- «Electrical valve, training stand»
- «Ball valves, sample board»
- «Gas filters, sample board»
- «Valves, sample board»
- «Elements of pipeline fittings, sample board»
- «Cast iron shut-off valve, stand»
- «Ball valve, stand»
- «Gas pressure controller RDG-50, split-type device»

Installation of gas distribution network equipment, training stand

Automated gaseous fuel boiler house

Gas pollution control system, training stand

Gas burner, split-type device

Electrical valve, training stand

Gas pressure controller RDG-50, split-type device

Gas filters, sample board

**Interactive manuals (CD) and classroom posters**

- Heat and gas supply and ventilation
- Compressor equipment
- Operation of gas distribution and gas consumption systems
- Technological processes and
- Industrial & occupational health & safety.

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Ball valves, sample board

DATA PROTECTION AND SECURITY SYSTEMS

Study labs and demonstration equipment

Network security

Block coding, laboratory stand

Structural interferences, laboratory stand

Symbol interleaving device, laboratory stand

Security audit of Wi-Fi wireless networks

Network security

- «Network security»
- «Security audit of Wi-Fi wireless networks»
- «Block coding»
- «Symbol interleaving»
- «Structural interferences»

Physical protection of information

- «Access control and management systems, teaching & practice stand»
- «Access control and management systems, virtual simulator»
- «Video surveillance systems, teaching & practice stand»
- «Video surveillance systems, virtual simulator»

Cryptographic data protection means

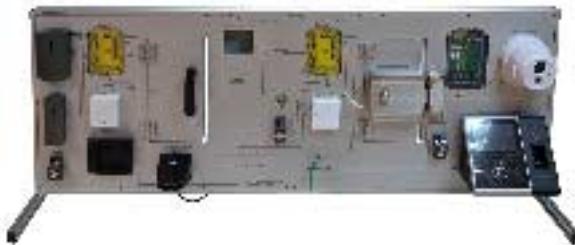

- «Cryptography software tools»
- «Cryptography hardware tools»
- «Basics of cryptography»
- «Cryptography software tools, digital textbook»
- «Basics of quantum cryptography, virtual simulator»

Software tools for information protection

- «Software tools for protecting information from unauthorized access»
- «Trusted download systems»
- «Application of hardware and software protection of information»

Technical tools for information protection

- «Protection of information from leaks through acoustic, optoelectronic and vibroacoustic channels»
- «Protection from data leaks through side EMP channels»
- «Protection from data leaks through electrical channels»
- «Detection of potential embedded devices»
- «Protection from data leaks through technical channels»
- «Detection of embedded devices and hidden video cameras»
- «Protection from data leaks through technical channels»
- «Certification of the informatization object according to the requirements of protection against leaks through the side EMP channel»
- «Protection of information from HF imposition»
- «Installation of AVAC protection equipment»
- «Detection of hidden video cameras»
- «Certification of an object according to the requirements of protection against information leaks through technical channels, virtual simulator»

Access control and management systems

Structural interferences

Virtual simulator
Access control and management systems

Video surveillance systems, teaching & practice stand

Cryptography Hardware, training stand

Video surveillance systems, teaching & practice stand

Virtual tutorial Cryptography software tools

Basics of cryptography

Virtual simulator
Fundamentals of quantum cryptography

Software tools for protecting information from unauthorized access, copy, training stand

Protecting information from leaks through the electrical channel

Application of hardware and software tools for protection of information, virtual simulator

Detection of potential embedded devices

Protecting information from leaks by acoustic vibration channels

Protection from data leaks through side EMP channels

Protection from data leaks through technical channels, virtual complex

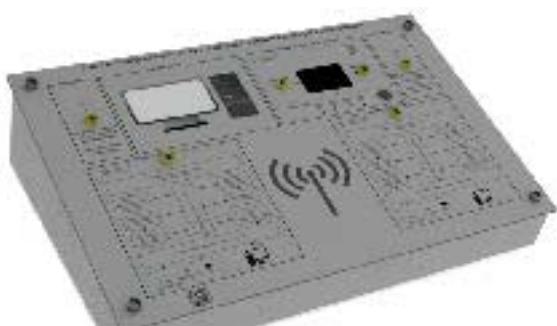

Detection of embedded devices
and hidden video cameras, virtual simulator

Interactive manuals (CD) and classroom posters

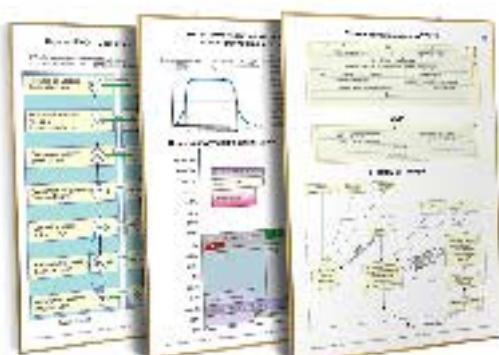

- Data protection
 - Security systems
 - HF and microwave technologies
- Demonstration complexes**
- Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Cryptography software tools

Teaching & practice stand
Electronic warfare

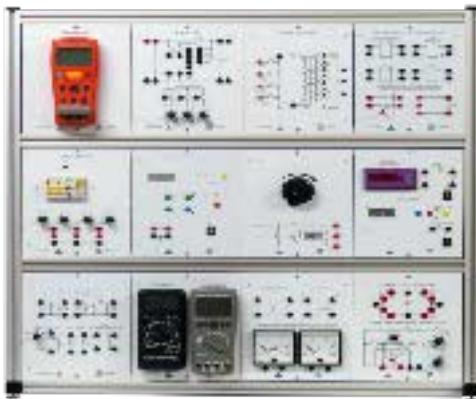

Electronic warfare, virtual simulator

Object certification
according to the requirements of protection against information
leaks through technical channels, virtual stand

INTERNET OF THINGS

Study labs and demonstration equipment

Basics of the Internet of Things (IoT-Base) technology

Internet of Things access control and management systems,
basic configuration of IoT-SKUD

Internet of Things in a smart city, virtual complex

Training and laboratory stand,

- «Industrial Internet of Things multi-level system with sensors and controllers»

Educational laboratory kit

- «Internet of Things in agriculture»

Training simulators

- «Fundamentals of the Internet of Things (IoT-Base) technology»
- «Communication technologies in the Internet of Things»
- «Internet of Things access control and management systems, basic configuration of IoT-SKUD»
- «Internet of Things in a smart home»

Virtual complexes

- «Internet of Things in a smart home»
- «Internet of Things in a smart city»
- «Internet of Things in agriculture»

- «Side-view radar stations (RBO-01)

Radiomontazhnik Laboratory (RMR)

Space-based radar stations (RKB-01)

Radio automation — linear continuous and pulse systems, (RA-L-MRC)

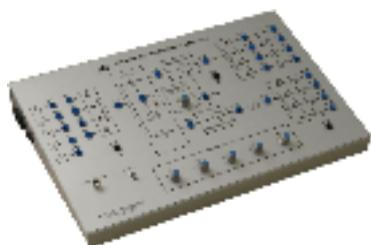

Signal generation and processing devices (UGiOS-01)

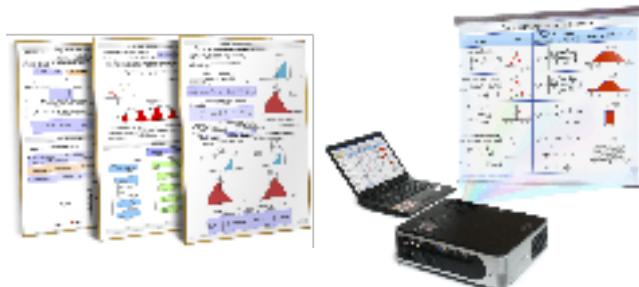

Signal reception and processing device (UPIoS-01)

Bandpass transmission/reception (PPP-01)

Temporary channel separation (VRK-01-MR)

**Interactive manuals (CD) and classroom posters**

- Radio circuits and signals
- HF and microwave technologies

Training and methodical complex

Basic equipment: projector, screen, laptop, pre-installed set of interactive posters, virtual laboratory, classroom posters.

INFORMATION AND MEASURING EQUIPMENT

Study labs and demonstration equipment

Physical basics of information obtaining

Measurement of electrical and non-electrical values.
Fundamentals of metrology

Elements of instrumentation sensors

Industrial pressure gages (PDD-SK)

Physical basics of information obtaining

- «Physical basics of information obtaining» (FOPI-1-M)
- «Physical basics of information obtaining» (FOPI-1-TiV)
- «Steam thermostat»
- «Zero thermostat»

Electrical measurements and fundamentals of metrology

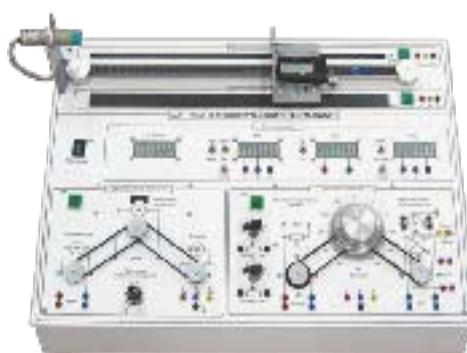

- «Desktop version, manual version»
- «Desktop version, computer version without PC»
- «Measurement of electrical and non-electrical values Fundamentals of metrology, desktop manual version»
- «Measurement of electrical and non-electrical values Fundamentals of metrology, computer desktop version» (without PC)
- «Measurement of electrical values, desktop version

Elements of instrumentation sensors

- «Friction in device rolling bearings» (TrOKP-021-2LR)
- «Friction in device sliding bearings» (TrOSP-021-2LR)
- «Errors in transmission gears» (PPZ-021-2LR)
- «Friction moments in gears with involute gearing» (MTrPEZ-021-2LR)
- «Flat elastic elements» (PIUE-021-3LR)
- «Elastic elements – membranes» (MemUE-021)
- «Elastic elements of shock absorbers» (UEA-021-2LR)
- «Elements of instrumental devices – shock absorbers» (EPUAm-021-2LR)

Industrial sensors

- «Industrial technological data sensors» (monoblock manual version) (PD-TI-MR)
- «Industrial mechanical quantities sensors» (monoblock manual version) (PD-MV-MR)
- «Industrial sensors» (monoblock manual version) (PD-MAX-MR)
- «Industrial level gages» (computer stand version) (PDU-SK)
- «Industrial flow sensors» (computer stand version) (PDR-SK)
- «Industrial temperature gages» (computer stand version) (PDT-SK)
- «Industrial pressure gages» (computer stand version) (PDD-SK)

Industrial sensors of mechanical values

Devices for measuring pressure,
flow rate, temperature and energy

Industrial temperature sensors

Sensor converter and data digitization systems

Sensor converter and and data digitizing systems, stands AVO

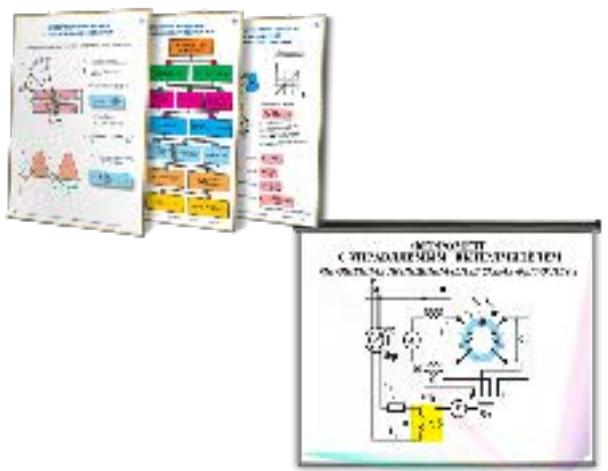

- «Sensor converter and data digitizing systems»
- (monoblock, basic) (DPO-MB-BN)
- (shelf-stand, basic) (DPO-PS-BN)
- (monoblock, extended) (DPO-MB-RN)
- (shelf-stand, extended) (DPO-PS-RN)
- «Thermocouple gradation»

Measurement of pressure, flow rate, temperature and energy

- «Pressure measuring devices and methods» (PMSI-08-MCh)
- «Pressure measurement methods» (MSI-D)
- «Instruments and means of pressure generation and measuring» (PSSID-010-6LR)
- «Pressure gages – pressure measuring devices» (DD-IPD-011-9LR-01)
- «Methods of temperature and humidity measurement» (MITiV-02)
- «Pressure, flow, temperature measuring devices» (IPDRT)
- «Flow, pressure and temperature gages in the housing and communal services system»
- «Measurement of electrical power and energy» (manual stand version) (IEME-SR) – (manual desktop version) (IEME-NR)

Industrial level sensors PDU-SK

Interactive manuals (CD) and classroom posters

- Fundamentals of metrology and electrical measurements
- Sensitive elements of sensors
- Technical measurements. Metrology, standardization and certification

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed set of electronic posters.

AUTOMATIC CONTROL THEORY AND SYSTEMS

Study labs and demonstration equipment

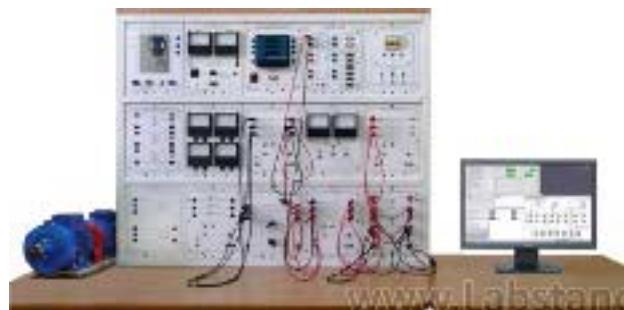

Industrial automation — Siemens programmable controller (PA-Siemens-NN)

Asynchronous motor automatic control and management systems (SAR-AD-NN)

Automatic control theory (TAU-SK)

Automatic control and management systems of a synchronous generator (ACS-SG-SK)

Automatic control theory

- «Automatic control theory» (computer stand version) (TAU-SK)
- «Automatic control theory» (desktop version with laptop) (TAU-NN)
- «Automatic control theory» (manual desktop version) (TAU-NRC)

Automatic control and control systems

- «Asynchronous motor» (desktop version with laptop) (SAR-AD-NN)
- «Permanent and alternating current electric motors» (desktop version with laptop) (SAR-ED-NN)
- «Servomotor» (monoblock version with laptop) (SAR-SD-MN)

Fundamentals of gas dynamics (OGD-010-13LR-01)

Straight-flow aerodynamic tube
(LC-TAP-017-25- R), (LK-TAP-017-25- PC)

Gazlift (NFT-GZL-010-7LR-01-PC), (NFT-GZL-010-7LR-01-R)

Interactive manuals (CD) and classroom posters

- Hydraulics
- Fluid Mechanics

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Aerodynamic tube (LC-TA-016-7,5-PC)

HYDRAULIC DRIVES AND HYDRAULIC AUTOMATION

Study labs and demonstration equipment

Hydraulic drives and automation of technological processes, lab

Basis of stands (SGU-UN)

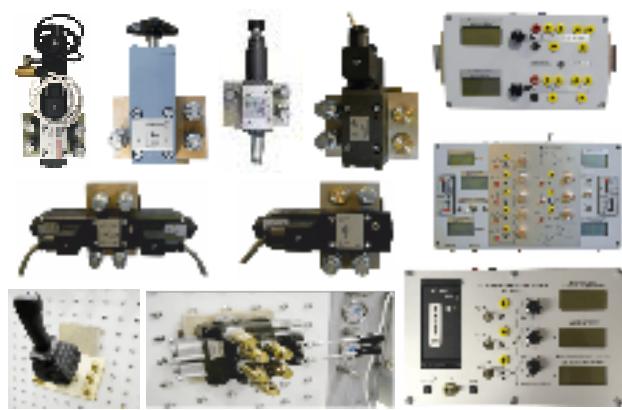

Electrohydroautomatics and drives laboratory (SGU-UN-145LR-019-02)

Operation and adjustment of hydraulic equipment with adjustable pumps and proportional equipment (SGU-UN-015-35LR-01)

Hydraulic drive, electrohydroautomatics and automation of industrial processes (SGU-UN-81LR-08-02)

Equipment of stands with elements of hydraulic drive, hydroelectric automation, electric automation

Universal one-sided and two-sided stands used to study hydraulic drives, hydro- and electrohydroautomatics and automation of technological processes (275 laboratory and design tasks with a maximum removable equipment set):

- «Basis of stands» (SSU-UN):

Stand options:

- Electrohydroautomatics and drives laboratory
 - Hydraulic drive, electrohydroautomatics and automation of technological processes, stand (SGU-UN-145LR-019-02)
- Hydraulic drive, electrohydroautomatics and automation of industrial processes (SGU-UN-81LR-08-02)
- Operation and commissioning of hydraulic equipment with adjustable pumps and proportional equipment (SGU-UN-015-35LR-01)
- Stand equipment with the elements of a hydraulic drive, hydroelectric automation, electric automation:
 - data processing and control program for pneumatic actuators;
 - hydraulic actuators of various types connected to sensors;
 - a set of hydraulic equipment (distributors, valves, pressure relays, etc.);
 - a set of hydraulic equipment with electrical control (distributors, electric relay and push-button control units, electric time and pressure relay units, etc.);
 - industrial controller unit;
 - a set of proportional hydraulic equipment (distributors, pressure valves, chokes);
 - electronic control unit for proportional hydraulic automation elements;
 - servohydraulics;
 - hydraulics of mobile, lifting and transport and agricultural machinery;
 - adjustable pumps with various controllers;
 - motion, force, pressure, flow sensors;
 - computer control unit

Training stands for the study of hydraulic drives, hydraulic devices, hydraulic machines and discrete electrohydroautomatics with fixed elements:

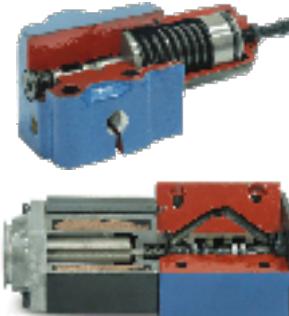

- «Hydraulic drives and hydraulic machines» (number of laboratory works — from 6 to 35)
- «Electrohydraulic drives and automation» (SGU-ST-010-23LR-01, SGU-ST-010-26LR-01)
- «Volumetric hydraulic machines and hydraulic devices» (SGU-IGM-08-12LR-01)
- «Industrial controllers in hydraulic drive control systems» (SGU-ST-011-33LR)
- «Controllable hydraulic machines, hydraulic drives and hydraulic automation» (SGU-RGG-GA-017-15LR-01)
- «Hydraulic machines and hydraulic drives of volumetric throttle control» (SGU-GMODR-013-11LR-01)

Volumetric hydraulic machines and hydraulic devices (SGU-IGM-08-12LR-01)

Industrial controllers in hydraulic drive control systems (SGU-ST-011-33LR)

Hydraulic equipment

Controllable hydraulic machines, hydraulic drives and hydraulic automation (SGU-RGG-GA-017-15LR-01)

Hydraulic reloading manipulator (SGU-GPM-RU-011), (SGU-GPM-EGSP-011)

Hydraulic drive of lifting and transportation machines (SGU-GP-PTM-KR-016-15LR-01)

Multichannel electrohydraulic redundant tracking drive (SGU-MREGSP-016-36LR-01)

Hydraulic drives and hydraulic machines (number of laboratory works – from 6 to 35)

Volumetric hydraulic machines

Teaching stands for the study of hydraulic systems of special equipment:

Examples of stands:

- «Hydraulic drive of road construction and lifting vehicles» (SGU-GP-DSiPTM-010-12LR-01)
- «Hydraulic reloading manipulator» (SGU-GPM-RU-011, SGU-GPM-EGSP-011)
- «Hydraulic drive of lifting and transportation machines» (SGU-GP-PTM-KR-016-15LR-01)

Training stands to study hydraulic systems of tracking control systems:

- «Electrohydraulic tracking drives — comparison of control methods» (SGU-EGSP-SSR-016)
- «Multichannel electrohydraulic redundant tracking drive» (SGU-MREGSP-016-36LR-01)
- «Electrohydraulic tracking drive» (SGU-EGSP-016-15LR)
- «Electrohydraulic tracking drive with digital control» (SGU-EGSP-PLC-CPU-21LR)
- «Electrohydraulic tracking volume control drive» (SGU-EGSP-OR-GM-016)
- «Electrohydraulic tracking drives of volumetric regulation» (SGU-EGSP-OR-HZ-016)

Split-type models of industrial hydraulic devices, units and equipment with a textbook describing the design and principle of device operation

- «Boards with split-type models of industrial hydraulic devices, units and equipment»

Interactive manuals (CD) and classroom posters

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

PNEUMATIC ACTUATORS AND PNEUMATIC AUTOMATION. GAS AND AERODYNAMICS

Study labs and demonstration equipment

Basis of stands
(SPU-UN)

Stand (SPU-UN-77EP-7V-
31PLK-018-02)

Stand (SPU-UN-122EP-
36PLK-018-01)

Pneumatic actuator of food
processing equipment
(SPU-UN-PO-013-25LR-01)

Equipment of stands with elements of a pneumatic drive,
pneumatic automation, electric automation

Universal one-sided and two-sided stands for the study of pneumatic drive, pneumatic and electro-pneumatic automation and automation of technological processes

(245 laboratory and design tasks with maximum configuration of removable equipment):

- Basis of stands (SPU-UN)

Stand options:

(SPU-UN-77EP-7V-31PLK-018-02)

(SPU-UN-122EP-36PLK-018-01)

Equipment of stands with elements of a pneumatic drive, pneumatic automation, electric automation

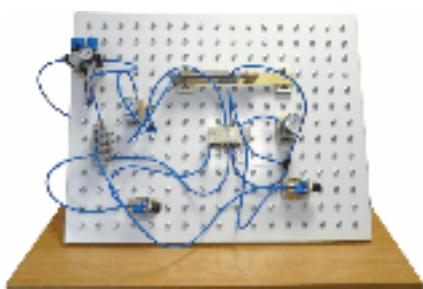

- data processing and control program for pneumatic actuators;
- pneumatic actuators of various types connected to sensors;
- a set of pneumatic equipment (distributors, valves, pressure switches, time relays, etc.);
- a set of pneumatic equipment with electrical control (distributors with electropneumatic control, electric relay and push-button control units, electric time and pressure relay units, etc.);
- industrial controller unit to be used both as part of stands and individually, without them;
- a set of proportional pneumatic equipment (distributors, pressure valves, chokes);
- electronic control unit for proportional pneumatic automation;
- vacuum equipment (suction cups, distributors, vacuum generators);
- motion, force, pressure, flow sensors;
- computer control unit

Desktop stands:

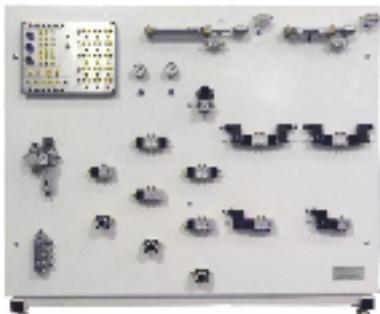

- «SPU series with removable elements»
- «ST series with permanently installed elements»

Stands to be mounted on profile plates:

- «Pneumatic actuator of food processing equipment» (SPU-UN-PO-013-25LR-01)
- «Automated technological assembly line based on mechatronic modules» (ATLSP-PMM-014-30LR-01)
- «Proportional pneumatic automation» (SPU-UN-PrP-013-23LR-PLK-22LR-01)
- «Proportional pneumatic automation» (SPU-UN-PrP-013-23LR-PLK-22LR-02)
- «Pneumatic actuator of food processing equipment» (SPU-UN-PO-013-25LR)
- «Electropneumatic tracking drive of digitally controlled force control systems»
- «Pneumatic and vacuum devices in process equipment of the food industry» (SPU-UN-PiVT-013-17LR-01)
- «Pneumatic drive of the automated assembly line based on mechatronic modules» (PP-ATLSP-PMM-014-35LR-01)
- «Tracking pneumatic actuators for mechatronic modules» (SPU-UN-SPP-MM-013-27LR-0)
- «Pulsed pneumatic stabilization system» (SU-IPSS-018-14LR-01-PK)

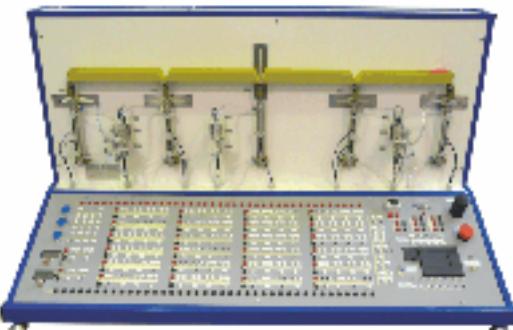

SPU series with removable elements

ST series with permanently installed elements

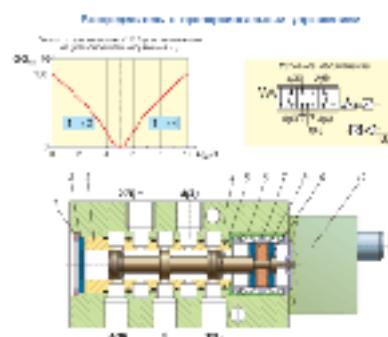

- «Pneumatic rotary platform stabilization system» (PSS-PP-018-10LR-01)
- «Control of technological equipment based on relay-contact devices and logic controllers» (UTO-RKU-PLK-30LR-01-PK)

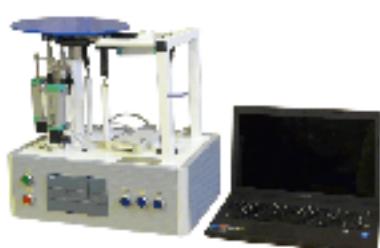

Control of technological equipment based on relay-contact devices and logic controllers (UTO-RKU-PLK-30LR-01-PK)

Automated technological assembly line based on mechatronic modules (ATLSP-PMM-014-35LR-01)

Pulsed pneumatic stabilization system (SU-IPSS-018-14LR-01-PK)

Pneumatic rotary platform stabilization system (PSS-PP-018-10LR-01)

Interactive manuals (CD) and classroom posters

- Pneumatic actuators and pneumatic automation.
- Compressor equipment
- Technological processes and
- Automatic control theory

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

PUMPING AND COMPRESSOR EQUIPMENT

Study labs and demonstration equipment

Pumping station

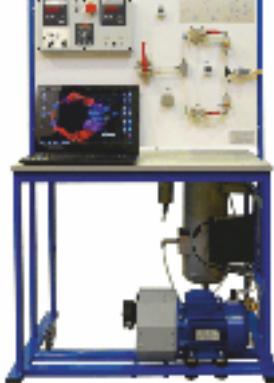

Piston compressor
(PK-010-4LR)

Vacuum piston pump
(PVN-010-4LR)

Operating processes of a two-stage
piston compressor
(RPDPK-018-06LR-01)

Automation of a compressor
station with a reciprocating
compressor (AKS-PK-8LR-10-01)

Piston pump (SGU-NP-010-4LR-01-R, SGU-NP-010-5LR-01-PK)

Compressors and vacuum pumps

- «Piston compressor» (PK-010-4LR)

Automation of a pumping station with a piston pump (ANS-PN-6LR-10-01)

Control of a pumping station (SU-UNPS-01)

Dynamic type pumps (SGU-NDT-017-9LR)

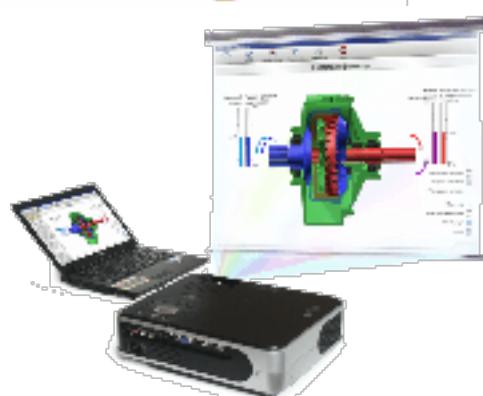

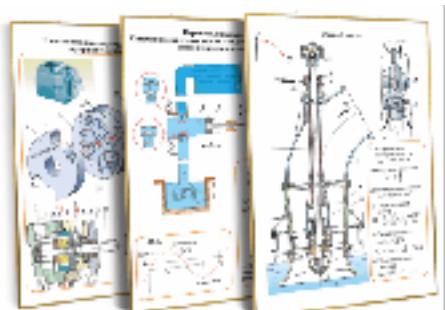

Split-type models of pumps of sectional centrifugal type CNS

Automation of pumping stations of water supply systems (SU-ANSSV-015-17LR-01)

Study of the peristaltic pump

Interactive manuals (CD) and classroom posters

- Pneumatic drive and pneumatic automation
- Compressor equipment
- Pumps and pumping units
- Vacuum technology

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Sequential and parallel operation of pumping units

Operation of pumps of various types

MATERIALS SCIENCE AND MATERIALS TECHNOLOGY

Study labs and demonstration equipment

Electrical Materials (ELCUT)

Defining specific volume and surface electrical resistances of polymer dielectrics at constant voltage

Determination of the heat resistance of a polymer material by Martens

Study of the Kinetics of Alloy Oxidation in air at high temperatures

Study of the microstructure metals and alloys

Virtual Labs

Devices and equipment for classrooms and laboratories

Electrical engineering materials

- «Electric engineering materials» (desktop version, computer version (without PC), (ELCUT student)
- «Electric engineering materials, desktop version, computer version» (without PC), (ELCUT professional), perpetual license
- «Metallography laboratory standard sets of educational equipment — materials science»

Standard sets of educational equipment. Study of the microstructure of metals and alloys

- «The design and the principle of operation of the microscope»
- «Heat treatment of metals»
- «Study of the microstructure of steel in the equilibrium state»
- «Study of the microstructure of non-ferrous alloys»
- «Study of the structure of carbon steel in the equilibrium state»

- «Errors in transmission gears, training stand» (PPZ-021-2/ 1P)
- «Installation, commissioning, testing and diagnostics of gears with a flexible link, educational complex» (MNID-PGZ-020)

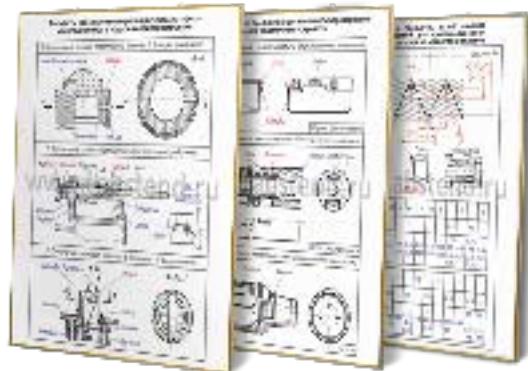

Fundamentals of mechanical transmissions and gears OMTP-022

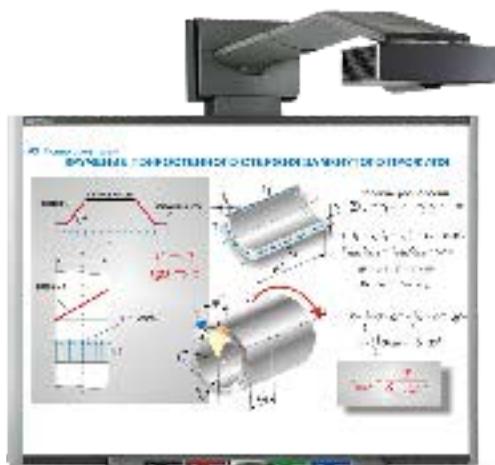

Pipeline repair

Balancing, alignment and vibration diagnostics BVV-019

Diagnosis of gear defects DM-DDZP-014-3LR

Alignment of shafts in the horizontal plane CVGP-015

Interactive manuals (CD) and classroom posters

- Engineering drawing
- Materials Science
- Technical mechanics
- Strength of materials
- Tolerances and technical measurements
- Vehicle parts
- Theory of mechanisms and vehicles

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

AUTOMOTIVE AND ROAD CONSTRUCTION EQUIPMENT

Study labs and demonstration equipment

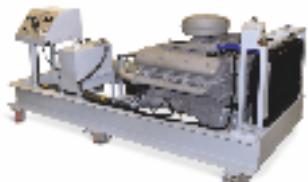

Cars, trucks and tractors (VAZ, GAZ, URAL, MTZ, KAMAZ)

Operating processes of diesel/gasoline internal combustion engines with a motor-generator or hydraulic loading unit

Operating processes of a 4-cylinder gasoline/diesel engine with a motor-generator or hydraulic loading unit

Multiplexer CAN gasoline engine control system

Actual engines (VAZ, GAZ, ZMZ, KAMAZ, YAMZ, MTZ, Cummins)

Training simulators of internal combustion engines of their units and assemblies

Electronic systems of trucks, buses, construction and agricultural machinery, diagnostic complex

Complete vehicles

- «Stands-simulators or in the section»
- «Cars, trucks and tractors» (VAZ, GAZ, URAL, MTZ, KAMAZ)
- «Snowmobiles, ATVs, jet skis»

Internal combustion engines

Laboratory complexes

- «Operating processes of diesel/gasoline internal combustion engines with a motor-generator or hydraulic loading unit»
- «Laboratory of testing and running-in of internal combustion engines»
- «Operating processes of a 4-cylinder gasoline/diesel engine with a motor-generator or a hydraulic loading unit»

Lab stands

- «Gas dynamics, educational and laboratory stand COMMON RAIL diesel engine control system»
- «Multiplexer CAN gasoline engine control system «
- «Diagnostics of the battery fuel supply system of the KAMAZ engine»
- «Diagnostics and adjustment of fuel injection pump»
- «Diagnostics of diesel fuel injectors and plunger pairs»
- «Motor-tester, diagnostic complex»
- «VAZ engine cooling system»
- «Electronic systems of trucks, buses, construction and agricultural machinery, diagnostic complex»
- «Actual engines» (VAZ, GAZ, ZMZ, KAMAZ, YAMZ, MTZ, Cummins)

Training stands (VAZ, GAZ, ZMZ, KAMAZ, YAMZ, MTZ, Cummins)

- «Training simulators of internal combustion engines of their units and assemblies»
- Board-stand with actual parts, light-dynamic (VAZ, GAZ, ZMZ, KAMAZ, YAMZ, MTZ, Cummins) valve train, crankgear
- Lubrication systems, fuel supply (diesel/gasoline) and air, HBO, cooling
- Split internal combustion engine static/dynamic (VAZ, GAZ, ZMZ, KAMAZ, YAMZ, MTZ, Cummins, John Deere)
- Internal combustion engine units and assemblies in the static/dynamic section (VAZ, GAZ, ZMZ, KAMAZ, YAMZ, MTZ, Cummins, John Deere)
- Training sets of internal combustion engine components and parts (VAZ, GAZ, ZMZ, KAMAZ, YAMZ, MTZ, Cummins, John Deere)
- Timing, KShM
- Lubrication systems, fuel supply (diesel/gasoline) and air, HBO, cooling

Transmission

- «Laboratory complexes»
- «Operating processes of friction clutch»
- «Operating processes of power distribution mechanisms of drive axles»
- «Operating processes of a hydrodynamic transformer»

Split internal combustion engine static/dynamic (VAZ, GAZ, ZMZ, KAMAZ, YAMZ, MTZ, Cummins, John Deere)

Lubrication systems, fuel supply (diesel/gasoline) and air, HBO, cooling

Transmissions Manual / Automatic/ DSG/Variator

Operating processes of power distribution mechanisms of drive axles

Manual gearbox, computerized training complex

Clutches

Dynamic/static characteristics of an automobile wheel

Transmissions Manual / Automatic/ DSG/Variator

Lab stands

- «Friction clutch» (static/dynamic)
- «Transmissions Manual /Automatic/ DSG/Variator2
- «Transfer boxes»
- «Cardan drives»
- «Drive axles and its mechanisms»

Training stands (VAZ, GAZ, UAZ, ZIL, URAL, YAMZ, MTZ, KAMAZ)

- «Manual gearbox, computerized training complex»
- «Transmissions Manual /Automatic/ DSG/Variator»
- «Transfer boxes»
- «Cardan drives»
- «Drive axles and its mechanisms»

Board-stands with actual parts (VAZ, GAZ, UAZ, ZIL, URAL, YAMZ, MTZ, KAMAZ)

- «Clutches»
- «Driving wheel drives»
- «Automatic gearboxes»

Light-dynamic board-stands

- «Mechanical transmissions»
- «Automatic transmission control systems»
- «Transmission control systems of motor vehicles»

Split-type products (VAZ, GAZ, UAZ, ZIL, URAL, YAMZ, MTZ, KAMAZ)

- «Transmission of a front-wheel drive/rear-wheel drive car»
- «Clutches»
- «Transmissions Manual /Automatic/ DSG/Variator»
- «Transfer boxes»
- «Cardan drives»
- «Drive axles and its mechanisms»

Undercarriage

Laboratory complexes

- «Operating processes of the automobile wheel»
- «Working processes of passenger vehicle suspensions»
- «Operating processes of shock absorbers of passenger cars»
- «Adaptive suspension workflows»

Lab stands

- «Dynamic/static characteristics of an automobile wheel»
- «Lever of the "MacPherson" type suspension» (static/dynamic)
- «Elastic suspension elements»
- «Spring suspension» (static/dynamic)

Drive axles and its mechanisms

Working processes of passenger vehicle suspensions

Shock absorbers (gas, hydraulic, pneumatic, hydropneumatic, adjustable)

Suspension control systems (hydraulic, pneumatic, hydropneumatic)

Suspension (MacPherson, lever, spring)

Car brake systems (classic, ABS, ESP)

Car brake systems (classic, ABS, ESP)

Training stands

- «Balancing the wheels of cars/trucks and tractors»
- «Tire work of cars/trucks and tractors»
- «Suspensions (such as "MacPherson", lever, spring) Board- stands with actual parts»
- «Wheels of cars/trucks and tractors»
- «Shock absorbers» (gas, hydraulic, pneumatic, hydropneumatic, adjustable)

Light-dynamic board-stands

- «Chassis» (passenger, truck, tractor, snowmobile, ATV)
- «Suspension control systems» (hydraulic, pneumatic, hydropneumatic)

Split-type items

- «Wheels» (passenger cars, trucks, tractors)
- «Shock absorbers» (gas, hydraulic, pneumatic, hydropneumatic, adjustable)
- «Suspension» (MacPherson, lever, spring)
- «Driving controlled axles and beams»

Brake system (hydraulic, pneumatic, hydropneumatic)Laboratory complexes

- «Brake stands of passenger cars, trucks»
- «Power stands of passenger cars, trucks»

Lab stands

- «Car brake systems» (classic, ABS, ESP)

Training stands

- «Brake system units and assemblies»

Board-stands with natural parts

- «Car brake systems» (classic, ABS, ESP)
- «Brake system units and assemblies»

Light-dynamic board-stands

- «Car brake systems» (classic, ABS, ESP)
- «Brake system units and assemblies»

Split-type items

- «Car brake systems» (classic, ABS, ESP)
- «Brake system units and assemblies»

Steering (trucks, cars and tractors)Laboratory stands, simulator stands, board stands with natural parts and light-dynamic, split-type items

- «Steering control with or without a hydraulic, electric booster»
- «Steering units and components with or without a hydraulic, electric booster»

Demonstration stands (quantorium)

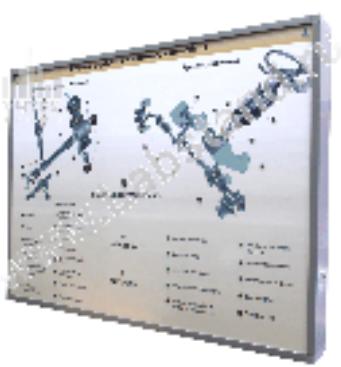

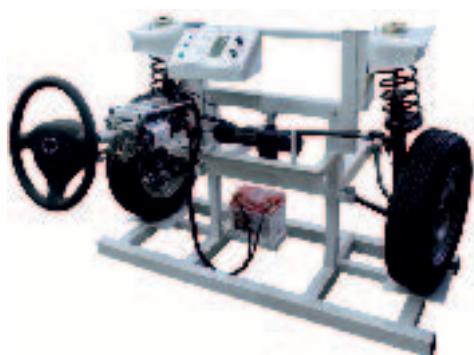

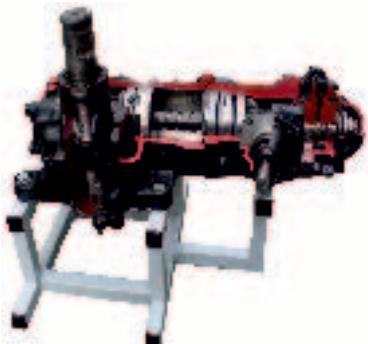

- «Steering geometry»
- «Adjustable wheel mounting angles»
- «Suspension arms of different lengths»
- «Wheel alignment adjustment»
- «Steering wheel. Steering wheel axis»
- «Wheel mounting angles»
- «Rolling shoulder»
- «Body, electrical equipment»

Lab stands

- «Hydraulic and pneumatic systems of cars and tractors»
- «Sensors and actuators of cars and tractors»
- «Car alarm system»
- «Multiplexer CAN control systems» (lighting devices, power window and mirror drives, windshield wiper and washer drives, audio system, door lock drives, air conditioning)
- «Electrical equipment of the KAMAZ/MTZ tractor»
- «Piston engine ignition systems and generator set

Brake system units and assemblies

Laboratory stands, simulator stands, board stands with actual parts, light-dynamic, split views

Training stands (bodies and frames of a car/truck, tractor)

Light-dynamic board- stands with movable elements

- «MTZ Bulldozer/Tractor Attachments»

Light-dynamic board-stands

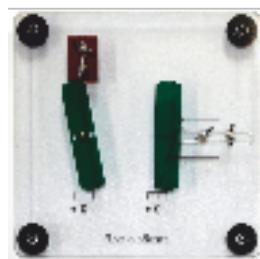

- «Excavator / Bulldozer / Roller / Scraper / Grader / Tractor Device»
- «ATV/ Snowmobile Electrical equipment»
- «Split-type items»
- «Tractor attachment system»

Operational materials

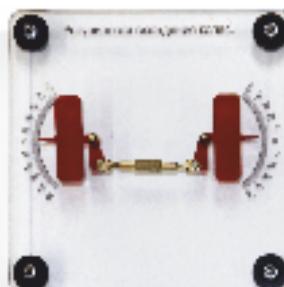

Samples of vehicle operational materials, board-stands

Training simulators and laboratories

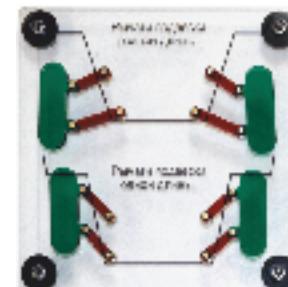

- «Viscometer, hydrometer, titrator, viscometric bath, refrigeration unit for determining the low-temperature properties of fuels and lubricants»

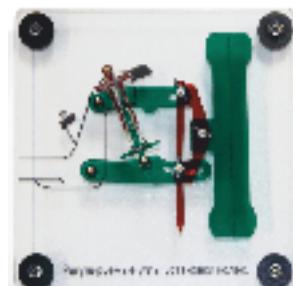

Rolling shoulder

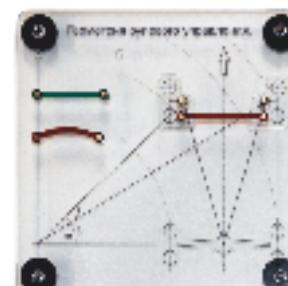

Wheel alignment adjustment

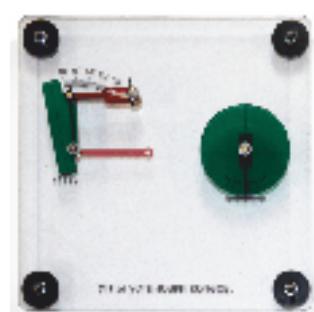

Suspension arms of different lengths

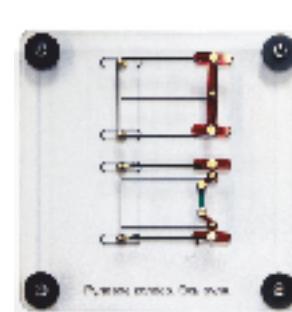

Adjustable wheel mounting angles

Steering geometry

Wheel mounting angles

Steering wheel.
Steering wheel axis

Electric equipment of the KAMAZ, training simulator

MTZ Bulldozer/Tractor Attachments

Samples of vehicle operational materials, board-stands

Testing and adjustment of fuel injection pump

- «Analysis of oils and fuels»

- «Estimating fuel pollution»

- «Oil drip test»

Equipment for fuel sampling and operational acceptance analysis

Equipment for vehicle maintenance and repair

Training simulators

Control of vehicle electrical equipment

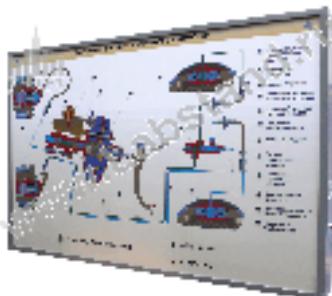

- «Diagnostics of gasoline/diesel injectors»
- «Checking and cleaning spark plugs»
- «Testing and adjustment of fuel injection pump»
- «Lifting equipment»
- «Diagnostics, assembly/disassembly of internal combustion engines and transmissions of passenger cars»
- «Checking and adjusting the wheels alignment angles»
- «Inspection line»
- «Cleaning of fuel systems»
- «Car CAN tire scanners»
- «Hand tool kits and tool carts»
- «Battery maintenance tool set»
- «Digital tachograph»

Training complexes

- «Tire work»
- «Dry and wet car cleaning»
- «Operational fluids»

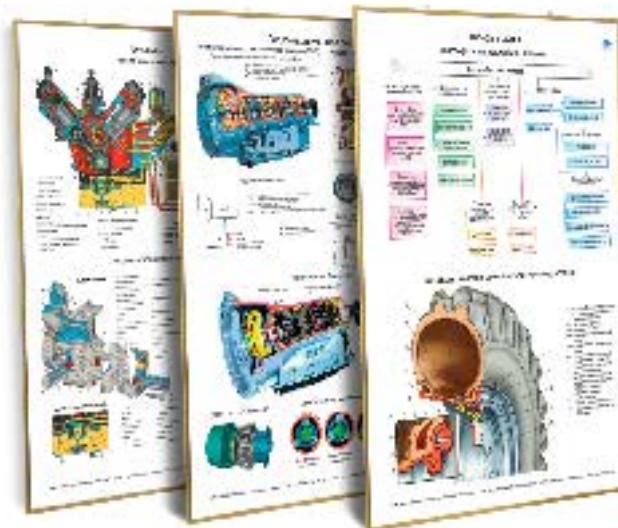

Multiplexer CAN control systems

Car brake systems (classic, ABS, ESP)

Car CAN tire scanners

Control of vehicle electrical equipment

Tire work

Operational fluids

Interactive manuals (CD) and classroom posters

- Vehicle configuration
- Road construction machines
- Agricultural machinery
- Electrical equipment of the car
- Internal combustion engines
- Tractors
- Tractor diesels
- Car maintenance
- Automotive operational materials
- Maintenance and repair
- of machinery in agriculture
- Traffic rules
- Transportation of hazardous goods
- Logistics
- Technology and organization
- of road construction
- Armored weapons and equipment

Demonstration complexes

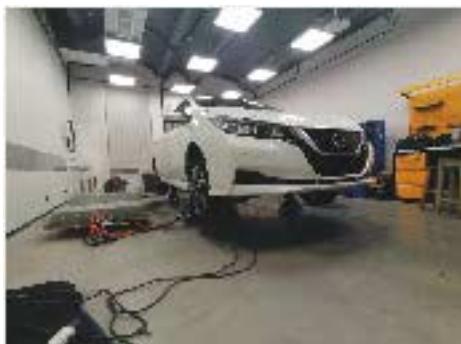

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

ELECTRIC TRANSPORT. VEHICLE ELECTRIC EQUIPMENT AND ELECTRONICS

Study labs and demonstration equipment

Electric vehicle model, stationary version of EM-MV-S

Functional model of an electric car

Traction batteries of electric vehicles

Innovative electrical switches

Electric transport Vehicle configuration

- «Electric vehicle model, laboratory stand, stationary version» (EM-MV-S)
- «Working model of the Nissan Leaf electric car»

Training stand

- «The power plant of an electric vehicle based on an asynchronous motor»
- «Electric vehicle power plant based on synchronous jet engine»
- «Power plant of a golf car based on a brushless DC motor»
- «Electric vehicle battery cooling system»
- «Model of the electric vehicle power units cooling system»
- «Electric vehicle insulation resistance monitoring system»
- «High-frequency 3-phase electric vehicle converter»
- «Electric vehicle synchronous jet engine control system»
- «Electric vehicle asynchronous motor control system»
- «Electric vehicle power contactor control system»
- «Electric vehicle sensor system»
- «Electric vehicle information bus»
- «Tesla electric door opener»
- «Tesla Autopilot system»
- «Electric vehicle power supply system»
- «Electric vehicle traction battery balancing system»
- «Electric vehicle interior heating and ventilation system»
- «Diagnostics of electric vehicle electrical equipment, simulator»
- «Working model of Toyota Prius hybrid car»

Electric vehicle batteries

- «Traction batteries of electric vehicles, lab stand»

Training stand

- «Internal resistance of lithium-ion batteries»
- «Internal resistance of lithium-titanium batteries»
- «Internal resistance of lithium-iron-phosphate batteries»
- «Internal resistance of lithium polymer batteries»
- «Internal resistance of nickel-metal hydride batteries»
- «Electric vehicle power battery control system, lab stand»
- «Assembly of an electric vehicle traction battery with 3» different types of drives, training set»
- «Electric vehicle charging station, lab stand»

Electrical engineering of electric vehicles

- «Innovative electrical switches, lab stand»
- «Types of electric vehicle charging connectors, training stand»

Board-stand

- «Contactor SP-EK-K»
- «Protective shutdown device SP-EK-RCD»
- «Circuit breaker SP-EK-AV»
- «Electromagnetic relay SP-EK-ER»

Board

- «Contactor P-EK-K»
- «Protective shutdown device P-EK-RCD»

Valve engine SP-ED-VD

Protective shutdown device P-EK-UZO, board

Asynchronous motor with a short-circuited rotor
P-ED-ADKR, board-stand

Asynchronous motor with phase rotor SP-ED-ADFR, board-stand

Linear actuator LD, standard training equipment set

Motor wheel MK, lab stand

Study of the construction of cars using alternative fuel,
virtual training complex

- «Circuit breaker P-EK-AV»
- «Electromagnetic relay P-EK-ER»

Electric motors

- «Valve engine, research stand»

Board-stand

- «DC motor» (SP-ED-DPT)
- «Asynchronous motor with a short-circuited rotor» (SP-ED-ADKR)
- «Asynchronous motor with phase rotor» (SP-ED-ADFR)
- «Valve engine» (SP-ED-VD)

Board

- «DC motor» (P-ED-DPT)
- «Asynchronous motor with a short-circuited rotor» (P-ED-ADKR)
- «Asynchronous motor with phase rotor» (P-ED-ADFR)
- «Split view of the traction asynchronous motor of an electric vehicle»
- «Split view of a traction synchronous jet engine of a hybrid car»

Linear actuator

- «Linear actuator LD, standard training equipment set»

Motor-wheel

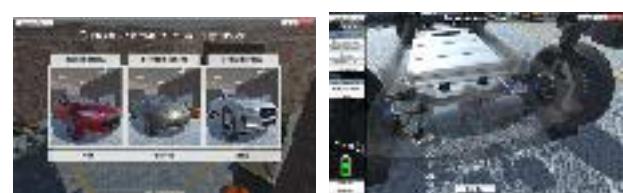

- «Motor wheel MK, lab stand»

Virtual training complexes (electric transport)**Virtual laboratory stand**

- «Technologies and equipment for the production of electric energy storage devices» (VUK-TOPNEK)
- «Study of the design of modern electric vehicles»
- «Study of the car designs using alternative fuel types
- «Trolleybus»
- «Tram»
- «Electric loader»
- «Electric locomotive»
- «Electric train»

Electrical equipment of a vehicle**Lab stand**

- «Material part and operation of the unmanned aircraft complex "Tachyon", VR SIMULATOR»
- «Gimbal Drone Test Bench, multirotor UAV testing, testing stand»
- «Automation, programming, control and assembly of UAVs»
- «Interactive models of aircraft engines»

Assembly and programming of various UAVs

Diagnostics and repair of a wing-type UAV

VR simulator - Hardware and operation of the Tachyon unmanned aviation complex

Flying wing UAVs

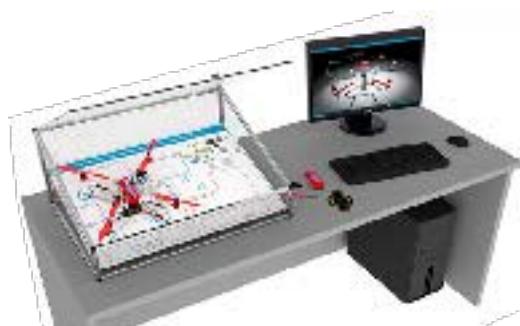

UAV piloting simulator (3 options)

UAV Piloting Simulator

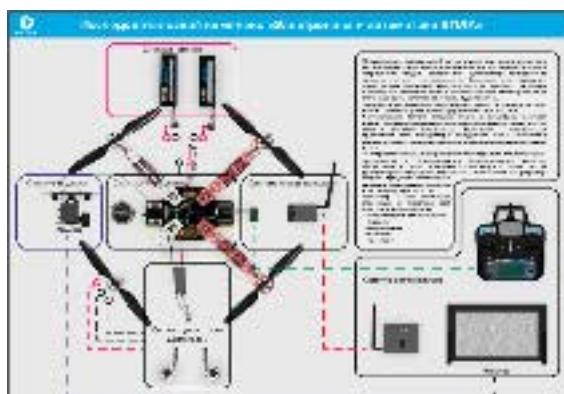

Laboratory of Aerodynamics and Aeromechanics

Automation, programming, control and assembly of UAVs

Simulator Operator of various UAV types

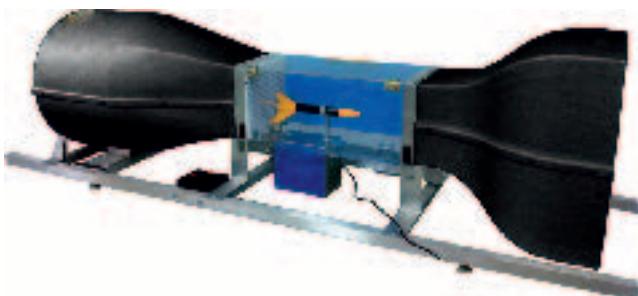

UAV electronics and equipment

ROCKET AND SPACE TECHNOLOGY

Study labs and demonstration equipment

Mock-ups of rocket technology with sections

A set of equipment for aerodynamic prototyping of model tests

Logistics, design and equipment of ground-based spacecraft complexes, virtual software package

Interactive demonstration of historical missions and launches, as well as promising space mission projects, virtual software package

Aircraft engines (virtual simulators)

- «Configuration, principle of operation and working processes of the LRE, virtual training complex»
- «Configuration, principle of operation and working processes of RTTT, virtual training complex»
- «Turbopump units of liquid rocket engines, virtual software package»
- «Laboratory of flaw detection and internal non-destructive testing of GTE, virtual training complex»
- «LRE mock-up»

Rocket and space complexes and equipment (virtual simulators)

- «Configuration and design of the Energia launch vehicle, virtual training complex»
- «Configuration and design of the SATURN V launch vehicle, virtual software complex»
- «Application of the emergency rescue system during the launch of spacecraft of the Soyuz series, virtual training complex»
- «Composition of the International Space Station, virtual training complex»
- «Logistics, design and equipment of ground-based spacecraft complexes, virtual software package»
- «Interactive demonstration of historical missions and launches, as well as promising space mission projects, virtual software package»

Astronomy and Celestial mechanics (virtual simulators)

- «Interactive three-dimensional model of the Solar system, virtual stand»
- «Visualization of the concept of jet propulsion, Tsiolkovsky formula, virtual software package»
- «Fundamentals of Celestial Mechanics, Kepler's laws and universal gravitation, virtual software package»

Physical operating models of rocket and space technology

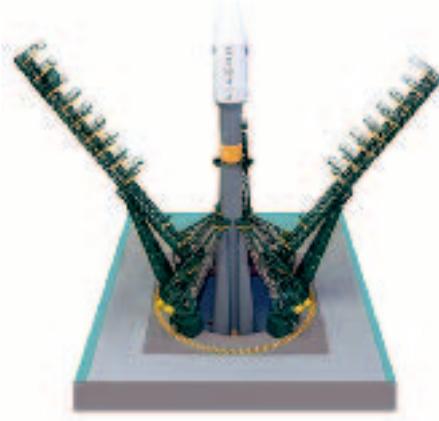

- The current mock-up of the «Vostochny cosmodrome»
- The current mock-up of the «launch site of the Soyuz-2 launch vehicle»
- Mock-ups of «Rocket technology with sections@
- «Current models of turbopump units of the LRE»

Prototyping and mocking-up in rocket and space technology

- «Laboratory complex of digital design and prototyping of spacecraft»
- «Laboratory of Structural and Layout Design and Prototyping of Spacecraft»
- «A set of equipment for aerodynamic prototyping of model tests»
- «UAV Prototypes Laboratory»

Rocket and space complexes and equipment (virtual simulators)

- «Structure and the design of the operational tactical missile R17, virtual training complex»

The current mock-up of the Vostochny cosmodrome

Configuration, principle of operation and working processes of the LRE, virtual training complex

Turbopump units of liquid rocket engines, virtual software package

- «The structure and design of Proton family launch vehicles, virtual training complex»
- «Configuration and principle of operation of various ballistic missiles, virtual training complex»
- «Design and construction of ballistic missiles by the example of the R2 rocket, virtual training complex»
- «Spacecraft design by the example of SOYUZ TMA, virtual training complex»
- «Configuration, design and principle of operation of Soyuz-2 missiles, virtual training complex»
- «Three-dimensional atlas of modern military equipment, virtual training complex»
- «Three-dimensional atlas of modern military equipment with a VR module, virtual training complex»

Models

- Interactive operating model of the radar station by the example of the radar complexes of the "Nebo" series"

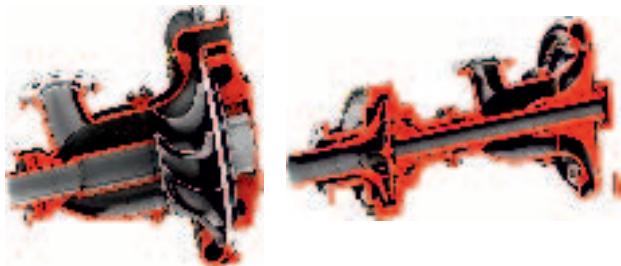

Device, principle of operation and working processes of liquid rocket engines (RD-180 LRE), emulator

Rocket Engine Testing System, emulator

LRE mock-up

Current models of turbopump units of the LRE

TE pumps and turbopump units of LRE, emulator

Design, principles of operation
and LRE working processes, emulator

- Large-scale interactive mock-up of the PK-24 Yars - 15P155M Missile system»
- Mock-up of the «15V180 combat control vehicle of the RS-24 Yars missile system»
- Mock-up of the «15V190 communication vehicle of the RS-24 Yars missile system»
- Mock-up of the «Combat duty support vehicle 15V240 of the RS-24 Yars missile system»
- Mock-up of «PU 9K720 OTRK Iskander-M»
- Mock-up of the «PU 9K720 OTRK Iskander-M in the starting position»
- Mock-up of the «3M24 Kalibr-K2 Missile Container Complex with X-35UE missiles»
- Mock-up of the «Club-K missile weapon container complex
- Mock-up of the «BPRK Bal machine»
- Mock-up of the «Bal missile system monted on MAZ-543»
- Mock-up of the «launcher 2P16 of the Luna complex»
- Mock-up of the «Luna-M missile system»
- Mock-up of the «Topol missile system»
- Mock-up of «MS Topol branding S7»
- Mock-up of the «Combat duty support vehicle PGRK Topol»
- Mock-up of the «Tochka missile system»
- Mock-up of the «Operational-tactical missile system Oka»

Turbopump units of liquid rocket engines, emulator

Design, operating principle and working processes of solid-fuel rocket engines, emulator

Control systems and high-precision
missile (projectile) guidance, emulator

Stellar correction and missile guidance systems, emulator

- Mock-up of the «OTRK Elbrus based on the unit 2P19»
- Mock-up of the «9K72 Elbrus tactical missile system»
- Mock-up of the «SKAD missile system»
- «Research of gyroscopic sensors, standard set of educational equipment:
 - desktop version with laptop, IGD-NN
 - desktop version with laptop IGD-NN or IGD2-NN;
 - computer stand version IGD-SK or IGD2-SK»
- «Servo drive and stabilization systems, standard set of educational equipment, stand design»

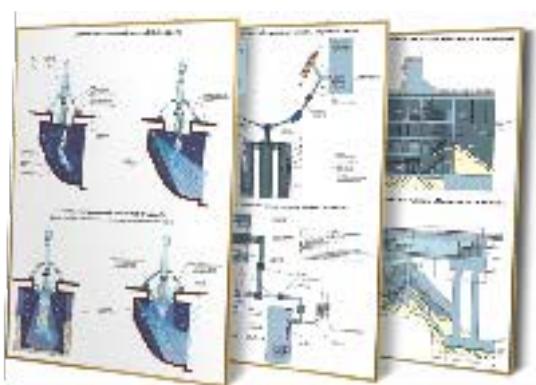

Logistics, configuration and equipment, emulator of a launch complex of the cosmodrome, emulator

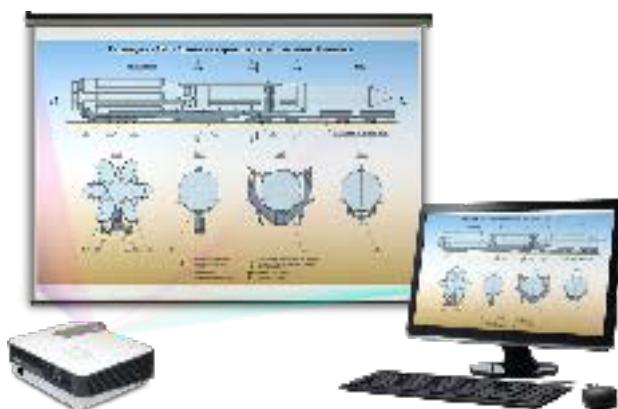

Liquid rocket engine, emulator

Methods of preparation and refueling with liquid components of special products, laboratory complex

Tracking systems for managing heavy loads, laboratory complex

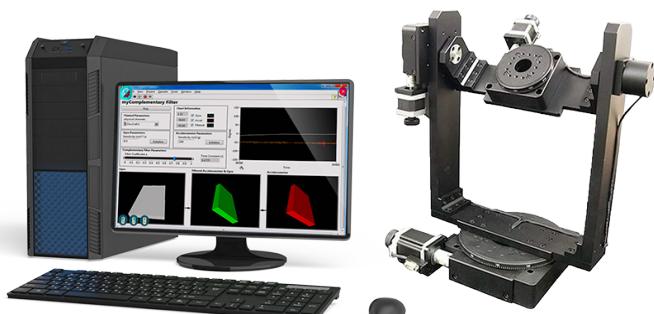

- Interactive manuals (CD) and classroom posters**
- Launch and technical complexes of rockets and spacecraft
- Demonstration complexes**
- Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

GYROSCOPY. NAVIGATION AND AIRCRAFT MOTION CONTROL SYSTEMS

Study labs and demonstration equipment

Laboratory of dynamics, inertial navigation and aircraft control

Micromechanics, lab workshop

The design and the principle of operation of various flight and navigation devices

Design and principles of stellar correction in ICBMs

- Dynamics, navigation and control**
- «Laboratory of dynamics and semi-natural simulation of aircraft flight»
 - «Euler angles during the movement of a movable coordinate system, laboratory unit»
 - «Micromechanics, lab workshop»
 - «The configuration and principle of operation of various flight navigation devices»
 - «Design and principles of stellar correction in ICBMs»
 - «Hardware and software complex for the study of navigation and guidance methods based on optical sensors»
 - «Methods to represent the spatial position of objects»
 - «Physical visual aids and current mock-ups»
 - «Servo drive and stabilization systems – 2 (SST2-SK)»

GPS Security, virtual tutorial

Servo drive and stabilization systems — 2 (SST2-SK)

Research of gyroscopic sensors (IGD-NN, IGD-SK)

Research of gyroscopic sensors-2
(IGD2-NN, IGD2-SK)

Physical visual aids and current mock-ups

- «Study of homing methods using various sensors and vision techniques»
- «Design and principles of operation of inertial navigation systems based on a three-axis gyro stabilizer»
- «Investigation of optical navigation methods using CV methods»
- «Design, composition and principle of operation of free-form navigation systems (BINS)»

Gyroscopes

- «Research of gyroscopic sensors» (IGD-NN, IGD-SK)
- «Investigation of gyroscopic sensors-2» (IGD2-NN, IGD2-SK)
- «Virtual laboratory of gyroscopic sensors and inertial navigation systems of rockets»
- «Measurement of gyroscope parameters, laboratory unit
- «Gyroscope, laboratory stand»
- «Principle of operation of a laser gyroscope (study of the Sagnac effect), laboratory stand»
- «Laser gyroscope, virtual visual aid»
- «Virtual simulator of the operation of a solid-state wave gyroscope»
- «Virtual visual aid Fiber-optic gyroscope»

Study of the principle of operation of a laser gyroscope

Hardware and software complex for the study of navigation and guidance methods based on optical sensors

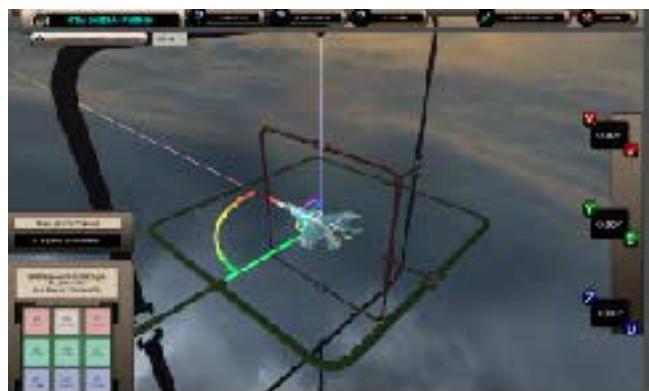

Gyroscope, laboratory stand

Device and principles of inertial navigation systems based on triaxial hydraulic stabilizer

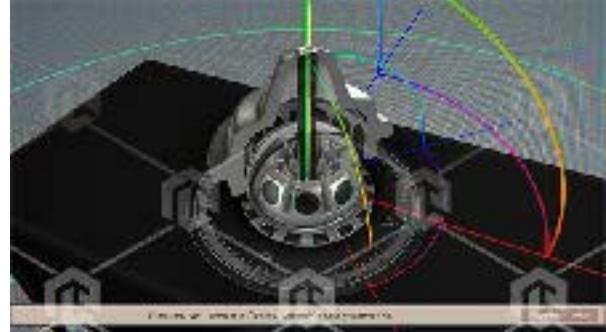

Virtual laboratory of gyroscopic sensors and inertial navigation systems of rockets

Ways of representing the spatial position of objects
(Euler angles and quaternions)

Fiber Optic Gyroscope

Solid-state wave gyroscope

Laser gyroscope

Device and principle of operation of various ANN sensors

Measurement of gyroscope parameters

Euler angles (TM-DM-UE-014)

Principle of operation of a laser gyroscope (study of the Sagnac effect), laboratory stand

Training and methodological complexes (didactic software, electronic and printed posters, laptop, projector):

- Fundamentals of gyroscopy and navigation LP
- Navigation systems and ways to suppress LP-Nvg
- Navigation applications of space technology LP-Ksm
- Infrared reconnaissance and search facilities LP-IKRP

RAILWAY TRANSPORT AND TRACK FACILITIES

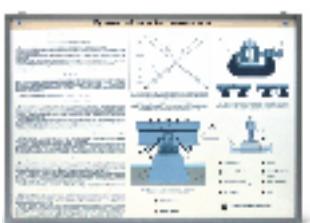

Study labs and demonstration equipment

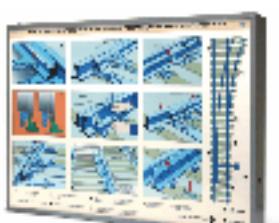

Storage cabinet for board stands

Classification of defects and damages of switch elements

Engineer's crane

Malfunctions of switches requiring urgent elimination

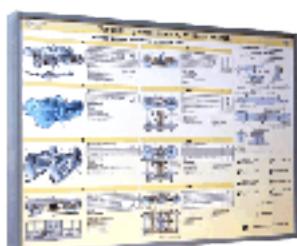

Scheme of track development at the stage and station

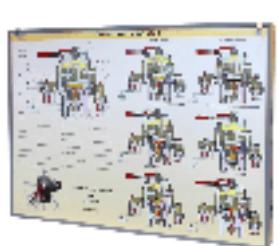

Diesel engine of the TEM-18 diesel locomotive

Fencing of obstacles for the movement of the train and places of work

Trucks of freight cars, their malfunctions

Engineer's crane

Path and track facilities

Board-stands (16+ varieties)

- «Storage cabinet for board stands»
- «Classification of defects and damages of switch elements»
- «Trackwork on a jointless track»
- «Malfunctions of switches requiring urgent elimination»
- «Scheme of track development at the stage and station»

Demo mock-ups

- «Fencing of obstacles for the movement of the train and places of work»

Traction rolling stock

Training stands

- «Locomotive braking system»

Board-stands (80+ varieties)

- «Diesel engine of the TEM-18 diesel locomotive»
- «Engineer's crane»

Split-type items

- «TK-41 turbocharger, ChME3 diesel locomotive truck, combined diesel regulator, diesel locomotive fan hydraulic drive, gas distribution mechanism and limiting governor»

Demo mock-ups

- «Fuel, oil and water systems of diesel D100, oil, water and fuel system of diesel 1A-9D, fuel, oil and water systems of diesel D50»

Wagons and wagon facilities

Training stands

- «Freight car brake system»

Board-stands (35+ varieties)

- «Trucks of freight cars, their malfunctions»
- «Automatic coupling device and its malfunctions»
- «Solid-rolled wheel»
- «SAUT-CM interaction with wayside facilities»

Demo mock-ups

- «Automatic coupling of the car SA-3»
- «Trolley 68-4096 with disc brakes»

Facilities and devices of the SCB

Training stands

- «SCB electric motor, SCB transformer, track box, installation, commissioning and testing of light alarm devices»

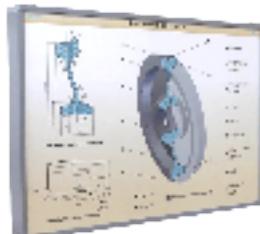

Railway special equipment

Board-stands (10+ varieties)

- «Trolleys, motor vehicles, motor vehicles and their characteristics, inspection of the motor vehicle, trolley, motor vehicle at the reception and delivery of the shift, malfunctions of the crew part, hydraulic transmission UGP-230, lifting crane MPT-4, snowplow SM-2, Control circuit, power supply and lubrication of hydraulic transmission, etc.»

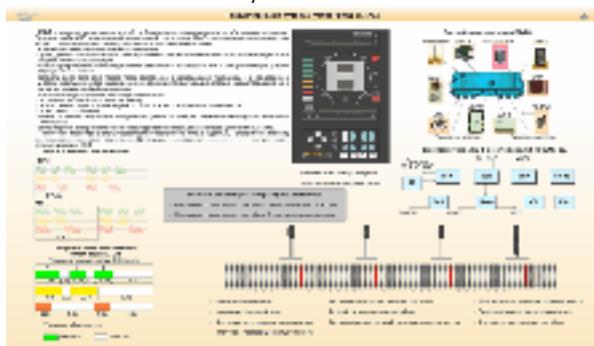

Automatic coupling device and its malfunctions

Solid-rolled wheel

SAUT-CM interaction with wayside facilities

Locomotive and track devices CLUB

Traffic light alarm system (computer controlled)

Driver of the VL11M electric locomotive

Traffic safety

Board-stands (10+ varieties)

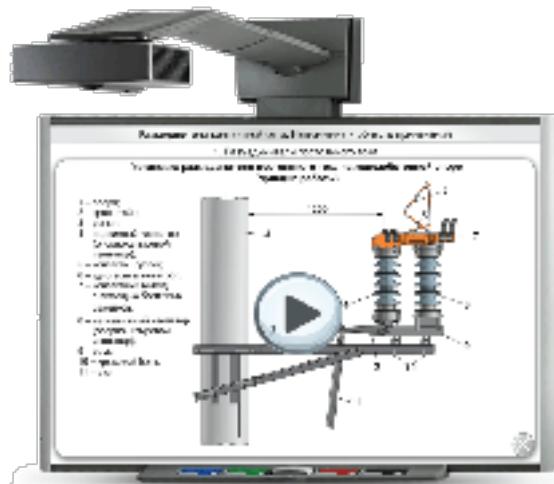

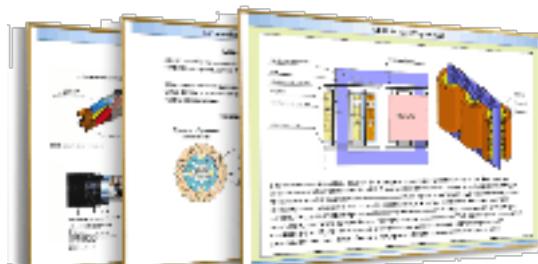

- «Locomotive and track devices CLUB» Traffic light alarm system (computer controlled)

Training simulators (more than 18 names)

- «Driver of the VL11M electric locomotive»
- «Driver of the TEM2 shunting locomotive»

Driver of the TEM2 shunting locomotive

Interactive manuals (CD) and classroom posters

- Electric substations of electrified railways
- High voltage technology
- Power supply networks design and maintenance
- Rolling stock design, maintenance and repair

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

MARINE AND RIVER EQUIPMENT. SHIPBUILDING

Study labs and demonstration equipment

Vibration testing of vessels

Virtual simulator for managing small vessels

Steam turbine power plants, VLS

Rowing electric devices with propulsion and steering complexes, training stand

Laboratory of hull ship design and prototyping

Ship design

- «The structure and design of the Arctic Class I cebreaker 8 nuclear fuel tank»
- «Study of architectural and structural types of modern timber-package trucks»
- «Study of architectural and structural types of modern bulk carriers»
- «Study of the Aframax class tanker design and its special systems»
- «Study of the architectural and structural type of a vessel by the example of a vessel of the type Helmet Alice/Izvestia»
- «Basic concepts of the geometry of the hull shape (ship surface)»
- «Design of the main elements of a ship power plant, distribution of electricity to current consumers, virtual stand»
- «Structural elements of ship systems of tankers»
- «Design and construction of the ship's hull»
- «Determination of ship stability, physical stand»
- «Vibration testing of vessels, training stand»
- «Principle of operation and arrangement of ballast tanks, training stand »
- «Laboratory of Hull Ship Design and Prototyping»
- «V.U.K. Logistics of modern shipbuilding complexes, laboratory»

Ship management

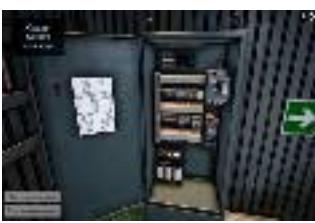

- «Virtual simulator for managing small vessels»
- «Simulator of a gantry crane (port)»
- «Ship management, vessel towing and anchoring, virtual laboratory»
- «Marine power systems and units»
- «Marine electric power generators, VLS»
- «Ship electrical energy converters, VLS»
- «Ship power plant with a halogen generator set, training stand (or emulator)»
- «Ship power plant with valve generator sets, training stand (or emulator)»
- «Diesel power plants, VLS»
- «Gas turbine power plants, VLS»
- «Steam turbine power plants, VLS»
- «Nuclear power plants, VLS»
- «Emergency sources of electric energy, VLS»
- «Ventilation and air conditioning, VLS»

Tools and apparatuses of ship systems

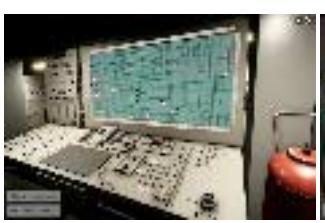

Electric drives of ship systems

Electric drives of ship systems

Operation and repair of shipboard electrical equipment

Shipboard cable network.

Diagnostics of shipboard electric cables and networks

Shipboard lighting and alarm systems

Shipboard electric equipment

Electric drives, equipment and instrumentation

- «Rowing electric devices with propulsion and steering complexes, training stand»
- «Lateral thrusters with adjustable and fixed pitch screws, training stand»
- «Electric rowing units, VLS»
- «Electric drives of ship systems, VLS»
- «Emergency engines and batteries, VLS»
- «Electrical equipment of vessels, VLS»
- «Devices, tools and apparatuses of ship systems, VLS»
- «Systems of control, diagnostics and automatic control of ship systems, VLS»
- «Diagnostics of ship power plants, VLS»

Marine power systems and units

- «Marine electric power generators, virtual laboratory stand»

Electric drives of devices and critical mechanisms, instrumentation and control

- «Electric drives of ship systems, virtual laboratory stand»
- «Electric drives of deck mechanisms, virtual laboratory stand»

Electrical equipment of ship systems

- «Electrical equipment of ships, virtual laboratory stand»
- «Ship cable network, virtual laboratory stand»
- «Tools and units of ship systems, virtual laboratory stand»
- «Ship power plant with a shaft generator set, virtual laboratory stand»

Automation of ship systems

- «Remote control of the main ship power plant, virtual laboratory stand»

Diagnostics and repair of ship systems

- «Diagnostics of ship electrical cables and networks, virtual laboratory stand»
- «Operation and repair of ship electrical equipment, virtual laboratory stand»

Interactive manuals (CD) and classroom posters

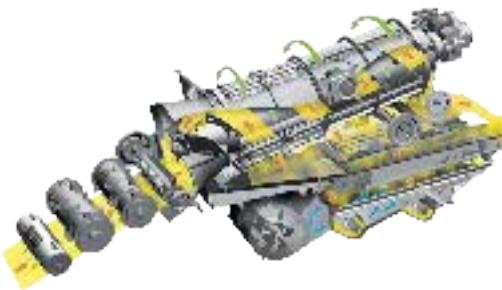

- River vessels

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

AGRICULTURAL MACHINERY AND TECHNOLOGY

Study labs and demonstration equipment

Don Torum combine thresher

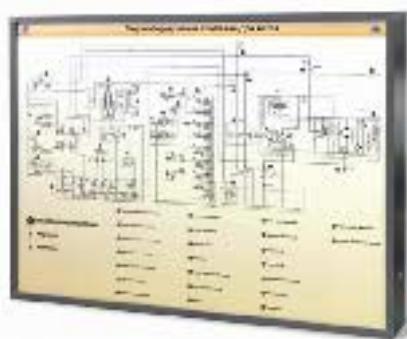

Working bodies of the cultivator KPM-b

Working body of the plow PLN-3-35

Seeding machines

Combine Don Acros

Tillage machines

Lab stands

- «Soil channel»

Training stands

- «Cultivator KLDN-4»

Board-stands with natural parts

- «Working bodies of the cultivator KPM-b»
- «Working body of the plow PLN-3-35»
- «Working body of the cultivator KPE-3.8»
- «Working bodies of the fertilizer machine RUN-0.8»
- «Working bodies of the cultivator KON-2.8»
- «Working bodies of the BDN-3.2 harrow»

Sowing machines

Training stands

- «Seeder for beet sowing SST-12»
- «Potato planting machine KSM-6»
- «Grain seeder SZ-3»

Board-stands

Board-stands with natural parts

- «Sowing machines»
- «Working bodies of the potato planter KSM-6»
- «Working bodies of the grain-grass seeder SZ-3.6»

Harvesting machines

Lab stands

- «Don Torum combine thresher»
- «Don Acres Combine thresher»

Training stands

- «Controls of the combine harvester Don Acres»
- «Potato digger KST-1.4»
- «Harvester ZhVN-6»
- «POWER STREAM header»
- «Board-stands with natural parts»
- «Working bodies of the harvester ZhVN-6A»
- «Working bodies of the KS-6B root harvester»
- «Cutting machine with planetary gear SHUMACHER»
- «Light-dynamic board-stands»
- «Electric equipment of the combine Don Acres»
- «Hydraulic equipment of the combine Don Acres»
- «Combine Don Acres»

Machine and tractor park

Lab stands

- «DT-75 crawler tractor attachments»
- «Belarusian-800 tractor attachments»
- «K-700 tractor attachments»

Mechanization of animal husbandry

Lab stands

- «Milk separator. Design, technological process»
- «Milking machine»

Training stands

- «Straw chopper POON-5A»
- «Seed cleaning machine SM-4»
- «Scraper conveyor»
- «Board-stands»
- «Board-stands with natural parts»

Milk separator. Design, technological process

Agronomist-Field Expert

Grain seeder SZ-3.6

Control systems of the dairy post of milking cows

Operation of the automatic control system of the granary equipment

- «Milking machine»
- «Working bodies of the straw shredder PUN-5A»
- «Milk separator»
- «Shearing machine»
- «Equipment for outdoor poultry keeping»

Light-dynamic board-stands

- «Centralized vacuum system of a dairy farm»
- «Technological process of preparation of feed for cattle»

Agronomy

Lab stands

- «Agronomist-field expert»
- «Agrochemical soil survey»

Automation of industrial processes in agriculture

Lab stands

- «Technological circuits, equipment and schemes of automatic control of watering plants»
- «Ventilation and air conditioning systems of poultry houses»
- «Air purification and disinfection systems in poultry houses»
- «Operation of a set of equipment for outdoor poultry keeping»
- «Operation of the lighting control system in the poultry house»
- «Control systems of dairy cow milking station»
- «Operation of the automatic control system of the granary equipment»
- «Operation of the automation system of grain cleaning and sorting processes»

Agricultural equipment and appliances

Lab stands

- «Animal feed analysis»

Interactive manuals (CD) and classroom posters

- Agricultural machinery
- Tractors. Tractor diesels
- Road construction machines
- Vehicle configuration
- Electrical equipment of the car
- Internal combustion engines
- Automotive operational materials
- Maintenance and repair of machines in rural areas.

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

MINING MACHINES AND TECHNOLOGIES

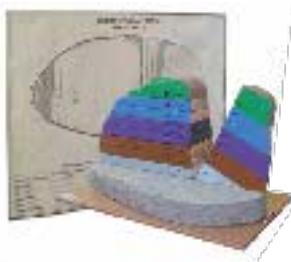

Study labs and demonstration equipment

Tunneling combine

Portable perforators, telescopic, Pneumatic support PPZ, Pneumatic drill, etc.

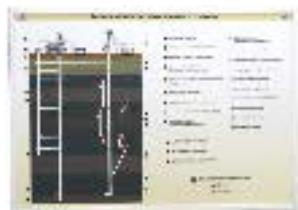

Horizontal occurrence of rocks

Open mining of mineral deposits

Elements of the occurrence of layers

Technological schemes of a mining enterprise

Automation of continuous transport systems

Physico-chemical properties of rocks

Stands with natural parts

- «Classification of rocks on the scale by M. M. Protodyakonov»
- «Collections of minerals and rocks»

Light-dynamic board-stands

- «Shifting of rocks under the influence of mining»
- «Stability of the quarry sides and slopes»
- «Methods of calculating reserves of mineral deposits»

Demo models/mock-ups

- «Elements of the occurrence of layers»
- «Horizontal occurrence of rocks»
- «Forms of intrusive bodies»

Educational laboratory equipment

- «Mills, Laboratory tablet press, Heating incubator, Dielectric testing apparatus»

Drilling machines and installations

Training simulators

- «Portable perforators, telescopic, Pneumatic support PP3, Pneumatic drill, etc.»

Board-stands

- «Impact drilling machine – portable perforator, Air distribution devices of perforators, Drill bits of perforators, Jackhammer»
- «Rotary drilling machine (core drill EBGP1/Boart Longyear)»

Mining machines and complexes

- «Cutting tools of ploughs, cleaning and tunneling combines»
- «Cleaning and tunneling combines, Coal plow, Mechanized support»
- «Loading-transporting and drilling-loading machines»
- «Coal-mining mechanized plow and combine complexes»
- «Shield tunneling and tunnel combine complexes»

Mining vehicles

Training simulators

- «Inclined and straight belt conveyors»
- «Roller system driven»
- «Screw conveyor»

Mining technology

Board-stands

- «Technological schemes of a mining enterprise, ore and mine lifting, mine degassing and drainage of mine fields, in the pit bottom and on the mine surface»
- «Stationary mine units»
- «Charge designs: solid core, dispersed core, boiler»
- «Transfer of the altitude mark to the min»
- «Centrifugal pump design»
- «Piston compressor»
- «Scheme for controlling the operation of pumps depending on the water level in the catchment area»

Demo models/mock-ups

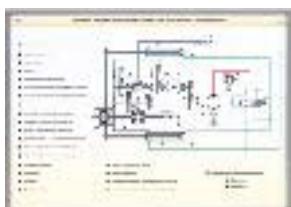

- «Explosive quarry block»
- «Underground mining of mineral deposits»

Screw conveyor

Roller system driven

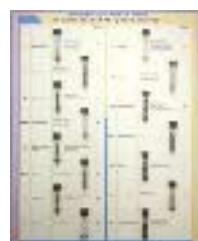

Rotary drilling machine (core drill EBGP1/Boart Longyear)

Mining machines and technological processes in the mine

Elements of the occurrence of layers

Classification of rocks on the scale by M. M. Protodyakonov

Screen, Slurry centrifugal pump type Warman 6/4

Automation of continuous transport systems

- «Centrifugal pump design»
- «Piston compressor»
- «Scheme for controlling the operation of pumps depending on the water level in the catchment area»
- «Axial fan demo mock-up»

Open-pit mining/Mineral enrichment

- «Modeling of ore drawing, training stand»

Board-stands

- «PKU front loader, EKG quarry excavator, Quarry Grader, Quarry bulldozer, BelAZ type quarry dump truck, Ground drilling rig for blasting in sections»
- «Technological schemes of coal mining, mineral processing, open-pit coal mining»
- «Heavy suspension separator, Light Fraction Screen, Demagnetizer, Thickener, Magnetic Separator, Hydrocyclone, Jigging Machine, Heavy Fraction Screen, etc.»

Demo models/mock-ups

- «Open mining of mineral deposits»
- «Screen, Slurry centrifugal pump of the Warman 6/4 type, Enrichment plants in a heavy-medium cyclone/by flotation, Conveyor belt, Horizontal centrifuge, Classification Hydrocyclone, etc.»

Posters: screw centrifuge; wedge, slide, ball valves; dewatering vibrating centrifuge

Interactive stands/virtual reality/software and methodological complexes

- «Open-pit mining, e-textbook»
- «EKG Excavator, Dragline, Rotary Excavator»
- «Mining machines and technological processes in the mine»
- «Mine compressors, pumps, lifts, trolleys»
- «Coal, Copper-zinc ores, Production of iron ore pellets, Gold, Appatite-nepheline ores»

Simulators

- «Quarry bulldozer, EKG excavator, SBSH-250 drilling rig»
- «Boomer, Simba drilling machine «
- «Caterpillar loader and transporter»
- «Ural-20R continuous heading machine»

**Interactive manuals (CD) and classroom posters**

- Electric drive and automation of mining operations
- Internal combustion engines
- Hydraulics, hydraulic drive and hydraulic automation
- Pneumatic drive and pneumatic automation
- Industrial & occupational health & safety

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

OIL AND GAS. MINING, TRANSPORTATION AND STORAGE

Study labs and demonstration equipment

Model of a rod pumping unit
(NFT-MShNU-010-5LR-01)

Hydraulic piston pumping unit
model (NFT-MHPNU-010-5LR-01)

Piston pump (SGU-NP-010-
4LR-01-R)

Gazlift (NFT-GZL-010-7LR-
01-R)

Piston compressor (PK-010-
4LR)

Pumping stations of petroleum
products transportation systems
(NFT-NS-010-5LR-01-R)

Hydraulic characteristics of the
oil reservoir model (NFT-MNP-
GKh-011-4LR-01-PK)

Oil pumping station and oil
storage tank farm

Oil production

- «Model of a rod pumping unit» (NFT-MShNU-010-5LR-01)
- «Model of a hydraulic piston pumping unit» (NFT-MHPNU-010-5LR-01)
- «Model of pneumatic piston pumping unit» (NFT-MPPNU-010-5LR-01)

Piston pumps

- «Piston pump» (SGU-NP-010-4LR-01-R)
- «Piston pump» (SGU-NP-010-5LR-01-PC)
- «Automation of a pumping station with a piston pump» (ANS-PN-6LR-10-01)

Lifting oil with the use of a gas lift

- «Gazlift» (NFT-GZL-010-7LR-01-R)
- «Gazlift» (NFT-GZL-010-7LR-01-PK)

Compressors and vacuum pumps

- «Piston compressor» (PK-010-4LR)
- «Operating processes of a reciprocating compressor» (RPPK-010-5LR)
- «Vacuum piston pump» (PVN-010-4LR)
- «Operating processes of a reciprocating vacuum pump» (RPPVN-010-5LR)
- «Automation of a compressor station with a reciprocating compressor» (AKS-PK-6LR-10-01)

Hydraulic characteristics of the oil reservoir model

- «Hydraulic characteristics of the oil reservoir model» (NFT-MNP-GKh-011-4LR-02-R)
- «Hydraulic characteristics of the oil reservoir model» (NFT-MNP-GKh-011-4LR-01-PK)
- «Hydraulic characteristics of the oil reservoir model» (NFT-MNP-GKh-010-6LR-02-R)

Oil and gas transportation

- «Oil pumping station and oil storage tank farm»
- «Fluid Mechanics – hydraulic shock» (MZh-GU-10-6LR-01)
- «Pumping stations of petroleum products transportation systems» (NFT-NS-010-5LR-01-R)
- «Automation of pumping stations of petroleum products transportation systems» (NFT-NS-010-13LR-01-PK)
- «Pumping station control system»
- «Oil separation»
- «Gas pressure regulator of the RDO type (LP-GA2), automated training system»

Gas pressure controller of the RDO type LP-GA2,
automated training system

Automation of pumping stations of petroleum products transportation systems (NFT-NS-010-13LR-01-PK)

Pumping station control system

- «Natural gas supercharger 398-23-1LSM (LP-GA2), automated training system»

Oil and gas refining, interactive mock-up set

- «Atmospheric block»
- «Vacuum unit»
- «Isomerization Unit»
- «ELOU Block»
- «Catalytic cracking unit»
- «Catalytic reforming unit»
- «Hydrotreating unit»
- «Gasoline re-distillation»
- «Stabilization column»

Visual and functional mock-ups

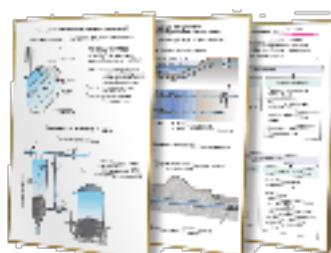

- «Reservoir park»
- «Strainer rectification column»
- «Unit of oil separation from gas and water»
- «Unit of secondary distillation of gasoline»
- «Atmospheric oil distillation column»
- «Gasoline stabilization column»

Visual and functional mock-ups

Oil separation

Interactive manuals (CD) and classroom posters

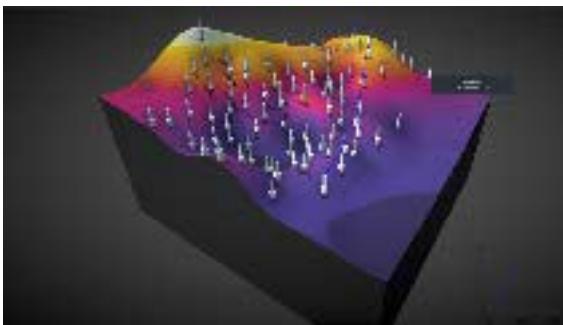

- Pumps and pumping units
- Compressor and vacuum equipment
- Hydraulics and hydraulic drives
- Industrial & occupational health & safety

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Oil and gas refining, interactive mock-up set

Geology and oil and gas production

Oil and gas treatment and processing

Oil and gas transportation and storage

Petrochemistry

Geology and oil and gas production

- «Construction and analysis of the facial map»
- «Principle of geophysical research of wells»
- «Migration of hydrocarbons in the Earth's crust»
- «Simulator of well drilling technology»
- «Drilling rig design and equipment»
- «Operation of gas wells»
- «Training simulator of hydraulic fracturing technology»
- «Operation of wells with rod pumps»

Oil and gas treatment and processing

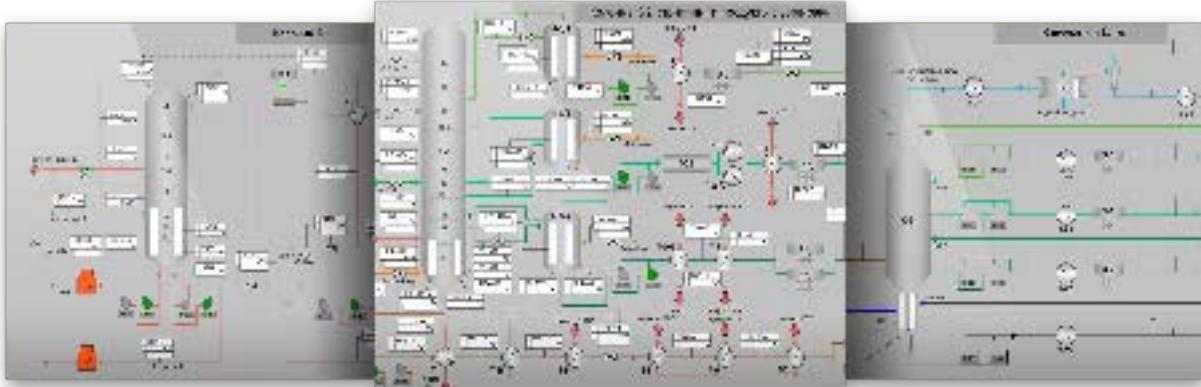

- «Design of gas compressors»
- «Design of a radiant convection tube furnace»
- «Arrangement of heat exchangers»
- «Design of the heat recovery boiler»
- «Features of primary oil refining» (ELOU-AVT)
- «Technological features of catalytic cracking»
- «Technological features of hydrotreating»
- «Technological features of catalytic reforming»

Oil and gas transportation and storage

- «Laying of the oil and gas pipeline» (underground, ground)
- «Deep-sea offshore pipeline systems»
- «Gas liquefaction»
- «Features of types of transportation of oil and gas products»
- «Fittings of the oil and gas pipeline»
- «Bypass and detection of defects of the oil and gas pipeline section»
- «Gate replacement»
- «Replacement of flange connection gaskets»

Petrochemistry

- «Dewaxing»
- «Pyrolysis»
- «Determination of viscosity of oil and petroleum products»
- «Determination of the fractional composition of oil»
- «Determination of oil density»
- «Determination of the water content in the composition of oil»
- «Determination of the content of chloride salts and oil»
- «Determination of low-temperature characteristics of the properties of oil and petroleum products»

Simulator of the technological unit of primary oil refining

Digital production processes AR-training courses for personnel of the Automated Control System "Transneft"

Digital twin of the gas compression shop of JSC "Taneco"

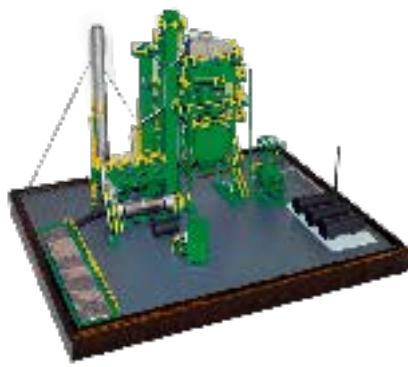

Gazprom Turbine

CONSTRUCTION MATERIALS. MACHINES AND TECHNOLOGIES

Study labs and demonstration equipment

Construction materials, machines and technologies

Asphalt concrete plant mock-up

Construction models

Construction of a residential building

Road works

Crane operator simulator

Mock-ups of construction plants

- «Concrete plant mock-up»
- «Asphalt concrete plant mock-up»
- «Cement plant mock-up»
- «Construction of a residential building, interactive model»

Construction production technology

- «Reinforcement work technology»
- «Technology of shuttering works»
- «Masonry technology»
- «Technology of work on the device of protective and insulation coatings»
- «Technology of finishing works»
- «Slinging operations»

Road works (technology and organization of construction)

- «Cement concrete and airfield coatings»
- «Road interchanges»
- «Automobile bridges»
- «Automobile overpasses»
- «Automobile overhead roads»
- «Automobile tunnels»
- «Railway overpasses»
- «Quality control of road works and road markings»

Construction demonstration kits

- «Nails, wall pins and anchors»
- «Types and groups of building mortars»
- «Various options of plastering works for interior and exterior decoration»
- «Concrete production»
- «Production of cement, lime and gypsum»
- «Measuring instruments used in construction»

Construction materials

- «Sound insulation materials»
- «Thermal insulation materials»
- «Mechanical testing of materials»
- «Rods and beam»
- «General bent rod stability»
- «Model of load-bearing structures of an industrial building»
- «Longitudinally compressed rod stability»

Construction machines

- «Crane operator simulator» (simulator)
- «Electrical equipment and electronics of lifting mechanisms of a tower crane»
- «Sensors in lifting mechanisms systems»
- «Mechanized model of a tower crane with a control panel» (metal; plastic)
- «Simulator of the DIGGER ZAXIS240 single-bucket hydraulic excavator»
- «Simulator of a quarry excavator EKG 8»
- «Bulldozer simulator»
- «Safety devices for lifting mechanisms»
- «Engines of construction machines of type A-41»

Electrical installation

- «Installation and commissioning of electrical equipment of enterprises and civil structures»
- «Electrical installation in residential and office premises»
- «Installation and commissioning of electric circuits of electric motors and automation»

Electrical devicesAutomation tools

- «Elevator automation and control tools»
- «Residential automation, control and security, fire and emergency alarm systems (Smart house)»

Water supply and sewerage systems

- «Management of pumping station in water supply systems»
- «Automation of pumping stations in water supply systems»
- «Automation in water supply and sanitation»
- «Distribution and regulation principles in heating systems»
- «Sequential and parallel operation of pumping units»
- «Plumbing equipment installation»
- «Hydraulic resistances of water fittings»
- «Sewerage system installation and maintenance»

Water purification and treatment systems

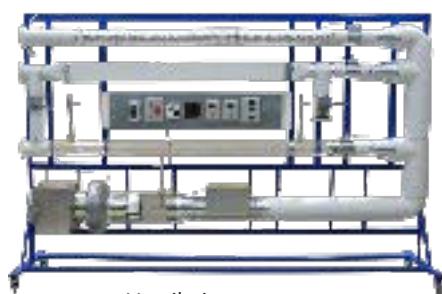

- «Wastewater treatment»
- «Reverse osmosis water desalination»
- «Water filtration»
- «Water treatment system: coagulation and flocculation»
- «Horizontal settling tanks»
- «Aerotank-sump with jet aerator»

Heating and ventilation systems

- «Ventilation systems»
- «Heat & gas supply and ventilation systems automation» (ATGSV-09-11LR-01)
- «Application of automation and dispatching tools in heating units of district heating systems of buildings»
- «Thermal and hydraulic characteristics of heating devices» (TGKhPTO-9LR-010)
- «Heat supply and heating devices» (PSTN-ST-13LR-10)
- «Autonomous automated heating system»
- «Automated liquid and gaseous fuel boiler house»
- «Automated heating unit»

Automation, control and security systems-
fire and emergency alarm of premises

Ventilation systems

Principles of distribution and regulation
in heating systems

Installation of plumbing equipment

**Interactive manuals (CD) and classroom posters**

- Geodesy
- Building structures
- Construction materials
- Construction machines
- Slinging operations
- Technology of construction processes
- Technology of carpentry, carpentry and glass works
- Roofing works
- Installation of sanitary systems and equipment
- Heat and gas supply and ventilation
- Installation and commissioning of electrical equipment for industrial and residential buildings
- History of Architecture

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

CRANES, EXCAVATORS, LIFTING AND TRANSPORT MACHINES

Study labs and demonstration equipment

Crane operator simulator

Crane operator simulator PROFESSIONAL -TK3-CNC

Hydraulic drive of road construction and lifting transport vehicles SGU-GP-DSiPTM-010-12LR-01

Simulators. Simulator

- «Crane operator simulator PROFESSIONAL-TK3-CNC»
- «Simulator of a car crane»
- «Hydraulic drive of road construction and lifting transport vehicles» (SGU-GP-DSiPTM-010-12LR-01)
- «Electric crane equipment» (EO-PK-ShN)
- «Hydraulic reloading manipulator» (SGU-GPM-RU-011)
- «Hydraulic drive of lifting and transport vehicles» (SGU-GP-PTM-KR-016-15LR-01)
- «Hydraulic reloading manipulator» (SGU-GPM-EGSP-011)
- «Electrical equipment and electronics of lifting mechanisms of a tower crane»
- «Tower crane electronics»
- «Sensors in lifting mechanisms systems»
- «Safety devices for lifting mechanisms»
- «Mechanized model of a tower crane with a control panel»
- «Simulator of the DIGGER ZAXIS240 single-bucket hydraulic excavator»
- «Simulator of a quarry excavator EKG 8»
- «Bulldozer simulator»
- «Slinging operations»

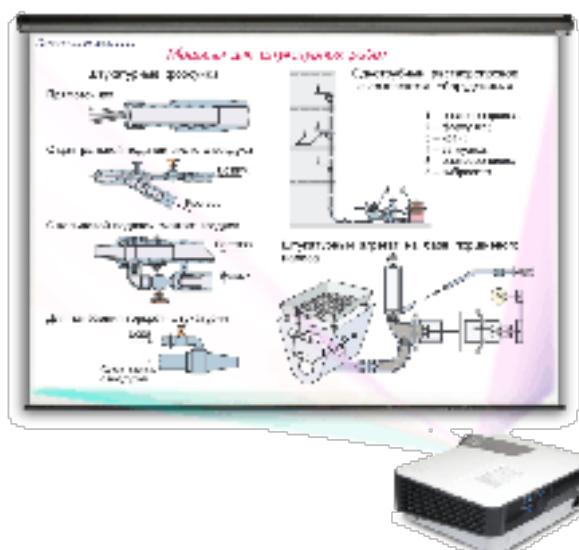

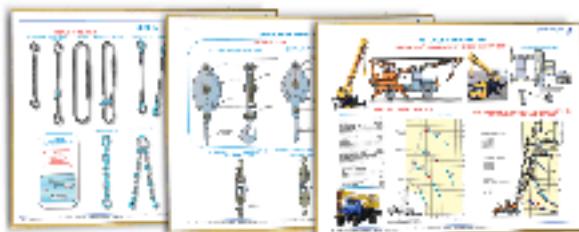

Simulator of a car crane

Hydraulic reloading manipulator (SGU-GPM-EGSP-011)

Electric crane equipment (EO-PK-ShN)

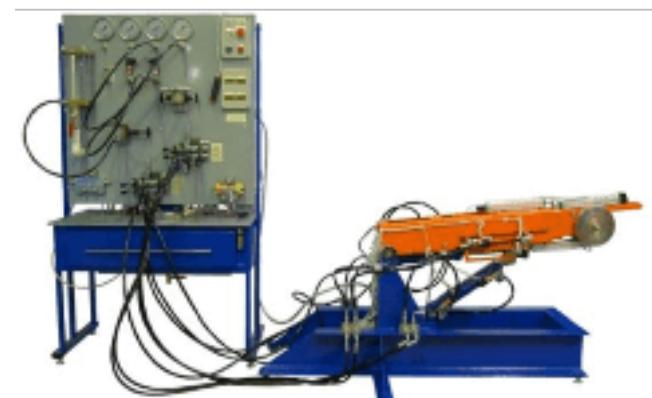

Interactive manuals (CD) and classroom posters

- Construction machines
- Slinging operations
- Construction production technology
- Building structures
- Machine parts and design basics
- Hydraulics and hydraulic drives
- Electronics
- Basics of electric drives
- Health & safety
- health and safety
- Installation and operation of electrical equipment

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Hydraulic drive of lifting and transport vehicles
(SGU-GP-PTM-KR-016-15LR-01)

Sensors in lifting mechanisms systems

UTILITY SYSTEMS. WATER , ENERGY AND HEAT SUPPLY

Study labs and demonstration equipment

Application of automation tools and dispatching in water supply systems

Metering and control devices in water supply systems

Pressure, flow and temperature measurements in water and gas supply systems

Hydraulics of multi-storey buildings

Water supply systems

- «Application of automation and dispatching in water supply systems, standard set of educational equipment» (PSAiD-SV-015-16LR-PK)
- «Metering and control devices in water supply systems, standard set of educational equipment» (PUiK-SV-015-9LR-R)
- «Metering and control devices in water supply systems, standard set of educational equipment» (PUiK-SV-015-15LR-PK)
- «Hydraulics of water supply systems of housing and communal services» (GSV-ZhKh-011-07LR-01)
- «Pressure and flow measurements in water supply systems» (ZhKH-09-6LR-01)
- «Measurements of pressures, flow rates and temperatures in water and gas supply systems» (ZhKH-09-16LR-02)

Pumping units and water fittings

- «Hydraulic resistances of water fittings»
- «Sequential and parallel operation of pumping units»
- «Determination of the performance characteristics of a centrifugal pump»
- «Centrifugal pumps» (SGU-CNS-012-6LR)
- «Pumping stations of water supply systems of housing and communal services» (NSSV-019-6LR-01-R)
- «Control of pumping station of water supply systems» (SU-UNPSSV-01)
- «Automation of pumping stations of water supply systems» (SU-ANSSV-015-17LR-01)
- «Pumping stations in water supply systems in multi-storey buildings» (NS-MNEZ-011-10LR-01-PK), (standard set of educational equipment)

Determination of performance characteristics of a centrifugal pump

Thermal and hydraulic characteristics of heating devices

Control of the pumping station of the water supply systems

Heating systems

- «Heat supply and heating devices» (PSTN-ST-13LR-10)
- «Thermal and hydraulic characteristics of heating devices» (TGKhPTO-9LR-010)
- «Autonomous automated heating system» (ASO-03)
- «Configuration, operation and accounting in building heating systems»

Installation and commissioning of housing and communal services systems

- «Installation, commissioning and repair of water supply and heating systems»
- «Sewerage system installation and maintenance»
- «Configuration, operation and accounting in building sewerage systems»
- «Installation and commissioning of electrical units up to 1,000 V in power supply systems» (desktop version)
- «Energy audit in the housing and communal services»
- «Automatic control and management of sanitary equipment of buildings»
- «Energy-saving technologies in housing and communal services»
- «Automated liquid and gaseous fuel boiler house» (AK-1)
- «Automated heating unit» (ATP-01)

Model mock-ups

- «Water supply and sanitation system of a multi-storey residential building»
- «Sewage collectors»
- «Fire-fighting water supply»
- «Water supply of industrial companies»
- «Potable water supply to the city»
- «Urban treatment plants»

Water supply and sanitation system of a multi-storey residential building

Interactive manuals (CD) and classroom posters

- Construction production technology
- Technology of carpentry, carpentry and glass works
- Roofing works
- Installation of sanitary systems and equipment
- Heat and gas supply and ventilation
- Natural and wastewater treatment technologies and instruments
- Metalwork

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

ECOLOGY. WASTE MANAGEMENT, DISPOSAL AND RECYCLING

Study labs and demonstration equipment

Coagulation and flocculation

Wastewater treatment

Horizontal settling tanks

Water treatment system: coagulation and flocculation

Water purification

- «Horizontal settling tanks»
- «Wastewater treatment»
- «Recycled water cooling system by air method»
- «Reverse osmosis water desalination»
- «Water filtration»
- «Water treatment system: coagulation and flocculation»
- «Horizontal settling tanks»
- «Aerotank-sump with jet aerator»
- «Water clarification by contact clarification»

Waste recycling laboratory

- «Plastic waste recycling laboratory»
- «Laboratory of solid waste processing for use in construction production»
- «Assessment of air dustiness»

Mini-express laboratory for educational environmental research Bee-U with modifications

Software and hardware training complexes in "Technosphere security"

- «Basic physical and chemical properties of waste»
- «Study of solid waste crushing methods»
- «Processing of slag from metallurgical industries»
- «Classification and characterization of industrial emissions»
- «Calculation of the maximum permissible emission»
- «Cleaning of exhaust gases by electroflootation»
- «Fundamentals of electrofilters calculation»
- «Waste water neutralization»
- «Analysis of sludge waters»
- «Gravitational deposition of spherical particles

Backpack field laboratory for the study of reservoirs "NKV-R" with modifications

- «NKV-R (basic version)»
- «NKV-R/m (shortended version)»

General and engineering ecology

- «Environmental workshop»
- «Research of water purification methods from petroleum products»
- «Research of water purification methods from suspended particles»

Virtual training complexes

- «Potable water treatment plants»
- «Wastewater treatment plants»
- «Methods of combating oil pollution in water bodies»
- «Waste gas dust cleaning technology»
- «Waste disposal technology»
- «Waste recycling technology»
- «Technology of waste recycling»
- «Recycling of environmental management waste»

Wastewater treatment plants

Waste recycling laboratory

Waste disposal technology

Calculation of the maximum permissible emission

Basic physical and chemical properties of waste

Assessment of air dustiness

Water filtration

Basic physical and chemical properties of waste

Reverse osmosis water desalination

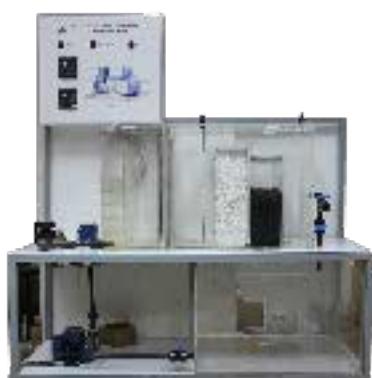

Interactive manuals (CD) and classroom posters

- General ecology
- Ecology for engineers
- Unconventional and renewable energy sources
- Natural and wastewater treatment technologies and instruments

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Research of water purification methods from petroleum products

LABS. PROFESSIONAL LEVEL/WSR – YOUNG PROFESSIONALS

Study labs and demonstration equipment

Radio arrangement lab (RMR)

Brewing

Welding simulator TSV-03

Industrial mechanics and installation

Design & supply of workshops for the following areas

- «Railway transport»
- «Consumer goods industry»
- «Mechanical Engineering, Aviation and Shipbuilding»
- «Construction»
- «Electrical engineering»
- «Nuclear industry»
- «Water transport»
- «Land transport»
- «Medicine»
- «Radio-electronics»
- «Fuel and energy complex»
- «Metallurgy»
- «Pharmaceuticals»
- «Information technologies»
- «Forestry & Timber production»
- «Agriculture»
- «Chemical industry»
- «Mining»
- «Industrial mechanics and installation»

* Design and supply of other classrooms as requested by the customers

TECHNOLOGY CLASSROOMS AND LABS

Study labs and demonstration equipment

Technology classrooms and labs

- «Technology classroom»
- «3D modeling and prototyping classroom»
- «Metalwork workshop»
- «Locksmith and mechanical workshop (CNC)»
- «Electrical installation, laboratory-workshop»
- «Robotics, laboratory-workshop»
- «CNC machines, laboratory-workshop»
- «Automotive equipment, laboratory-workshop»
- «Power engineering and alternative energy sources, laboratory-workshop»
- «Agricultural machines and technologies, laboratory»
- «Electric Transport, laboratory»
- «Oil & gas. Production and transportation, lab»
- «Construction, laboratory»
- «Medicine, laboratory-workshop»
- «Ecology. Cleaning and recycling, laboratory»
- «Food equipment and technologists, laboratory-workshop»
- «Aviation, unmanned aerial vehicles, laboratory»
- «Low-current networks, laboratory-workshop»

* Design and supply of other professional level / WSR workshops as requested by the customers

Interactive manuals (CD) and classroom posters

- Metalwork
- Mechanical engineering technology
- Construction materials technology
- Fundamentals of cutting theory and tools
- Metal-cutting machines
- Metal-cutting machines safety

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

MILITARY EQUIPMENT AND TECHNOLOGIES

Study labs and demonstration equipment

Simulator for driving infantry fighting vehicle BMP, software and hardware complex

Physical booby traps mock-ups (functional simulator), training complex

SMF models

Military uniform, virtual stand Armed Forces of the Russian Federation and NATO member states

Simulators of military equipment

- «Material part and operation of the unmanned aircraft complex "Tachyon", VR simulator»
- «Training complex-simulator for practicing navigation skills in the areas of GDP and VP according to GIMS»
- «Simulator for driving infantry fighting vehicle BMP, software and hardware complex»
- «Automobile engine, virtual training complex»
- «T-72 tank maintenance, virtual complex»
- «UAZ-3151 Maintenance, virtual complex»
- «UAZ-3151 driving simulator, lab complex»
- «KAMAZ-5350/4350 driving simulator, lab complex»
- «URAL-4320 maintenance, lab complex»
- «URAL-4320 driving simulator, lab complex»
- «ZIL-131 maintenance, lab complex»
- «ZIL-131 driving simulator, lab complex»
- «Virtual simulator for training the swinging and preparation for the flight of various types of UAVs, virtual training complex»

Educational mockups and dummies

- «Interactive model of terrains for tactical interaction and transport logistics classes for different armed forces»
- «Physical booby traps mock-ups (functional simulator), training complex»
- «Physical visual aids for hidden improvised explosive devices dummies, training complex»
- «Large-scale interactive mock-up of the RS-24 „Yars-15P155M” Missile system»
- «Mock-up of the 15V180 combat control vehicle of the RS-24 „Yars” missile system»
- «Mock-up of the combat duty support vehicle 15V240 of the RS-24 „Yars” missile system»
- «Mock-up of the 15V190 communication vehicle of the RS-24 „Yars” missile system»
- «Mock-up of the SKAD missile system»
- «Mock-up of MS Topol branding S7»
- «Mock-up of „Oka” operational missile system»
- «Mock-up of the „Bal” missile system monted on MAZ-543»
- «Mock-up of the combat duty support vehicle PGRK „Topol”»

General military training

- «Three-dimensional atlas of modern military equipment with a VR module»
- «Military uniform, virtual stand Armed Forces of the Russian Federation and NATO member states»
- «Training to work with portable and basic radio stations, VLC»
- «Virtual simulator for standard ammunition neutralization, Hardware and software complex»
- «Neutralization of standard ammunition, virtual simulator-laboratory»

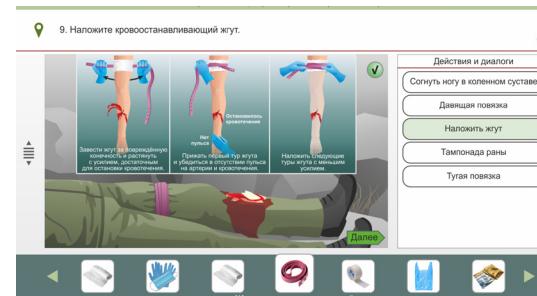

Interactive model of terrains for tactical interaction and transport logistics classes for different armed forces

First aid in military environment, virtual stand

- «Simplified laser shooting range for initial military preparation, training complex»
- «Tactical simulator of combat situations in virtual reality, software and hardware complex»
- «First aid in military environment, virtual stand»
- «Orders and medals, virtual stand»
- «Hybrid laser-pneumatic interactive shooting range, virtual stand»
- «Tactical training, virtual training complex»
- «Information transmission using Morse code, training complex»
- «An RSL air-to-air missile, virtual training complex»
- «Small weapons: configuration, operation and handling, virtual training complex»
- «Ammunition»
- «Radio relay communication»
- «Simulator-emulator Military chemical intelligence device» (LP-VPHR)
- «Simulator-emulator Tactical training»
- «Simulator-emulator Drill training»
- «Military Science, poster set»

Interactive training manual
Tactical medicine

Neutralization of standard ammunition, virtual simulator-laboratory

Orders and medals, virtual stand

Software and hardware complex T-72 tank driving and shooting simulator

Training and methodological complexes (didactic software, electronic and printed posters, laptop, projector):

- Management of military units and formations (LP-UV)
- Management of troops technical maintenance (LP-UT)
- Radiation reconnaissance and control equipment (LP-DP-5V)

FOOD PRODUCTION

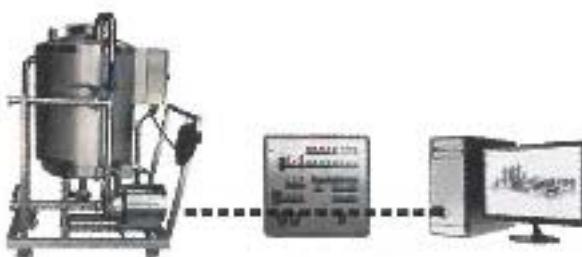

Educational laboratory and demonstration equipment. Stands. Trainers. Mannequins

Water treatment in food production

Flour sorting and sifting

Technologies of grain processing, preparation of flour products

Automated liquid dosing and packaging line
(AL-DUZH-13LR-01)

Grain processing

- «Flour sorting and sifting»
- «Preparation and kneading of dough»
- «Pasta production, pressing, molding, extrusion»
- «Automated pasta production line»
- «Technologies of grain processing, preparation of flour products»
- «Elevator, flour milling, grain and feed production»

Meat and fish processing

- «Meat-chopping machines»
- «Automated sausage production workshop»
- «Technology of meat processing and meat products»

Processing of milk and dairy products

- «Milk normalization & pasteurization»
- «Cottage cheese and cheese production»
- «Butter production»
- «Technologies of milk processing and dairy products»

Food technologies. Brewing

- «Complex heat treatment of raw materials and semi-finished products»
- «Water treatment in food production»
- «Drying, normalization and cooling»
- «Sorting and packaging»
- «Brewing»
- «Automated liquid dosing and packaging line» (AL-DUZH-13LR-01)
- «Automated bulk materials dosing and packaging line» (AL-DUSM-10LR-01)
- «Automatic flow, pressure and liquid level control» (AU-RDUJ-010-30LR-01)
- «Food preservation technologies»

Teaching & production laboratories:

- «Food preservation technologies»
- «Elevator, flour milling, grain and feed production»
- «Technologies of grain processing, preparation of flour products»
- «Technologies of milk processing and dairy products»
- «Technology of meat processing and meat products»

Food preservation technologies

Sorting and packaging

Brewing

Technologies of grain processing, preparation of flour products

Technologies of milk processing and dairy products

Elevator, flour milling, grain and feed production

Interactive manuals (CD) and classroom posters

- Catering products technology
- Bakery, flour and confectionery products production
- Public catering equipment
- Food production processes and equipment
- Introduction to Commodity Science
- Food science

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

BIOENGINEERING AND MEDICAL TECHNOLOGY

Educational laboratory and demonstration equipment. Stands. Trainers. Mannequins

Research Lab Rehabilitation of post-stroke patients

Laboratory of MIO Technologies and Cyber Prototyping

Modern high-tech medical labs

- «Research Lab Rehabilitation of Post-stroke Patients»
- «Interactive teaching games lab for the patient's limbs motor function rehabilitation»
- «Laboratory of MIO Technologies and Cyber Prototyping»

Equipment — medicine

- «Lung ventilation, standard teaching aids set»
- «Visual field analyzer, standard teaching aids set»
- «Determination of human reaction time, standard teaching aids set»
- «Human eye colors perception, standard teaching aids set»
- «Training cardiodiagnostic simulator for functional diagnosticians»
- «Training cardiac surgery simulator for cardiac surgeons»
- «Training cardiodiagnostic simulator for sports cardiologists»

Interactive and virtual stands (medicine)

- «Interactive 3D human anatomy atlas»
- «Virtual simulator for placing a 15-channel EC1»
- «Software and hardware simulator of Ilizarov compression-distraction apparatus mounting»
- «Virtual patient, virtual training complex»
- «Dentistry, virtual training complex»
- «Virtual therapist, Simulator-expert system for medical staff training and testing»
- «Heart anatomy and demonstration, virtual software package»
- «Virtual Surgery, virtual training complex»
- «Visual Biology, virtual training complex»

Software and methodological complexes (medicine)

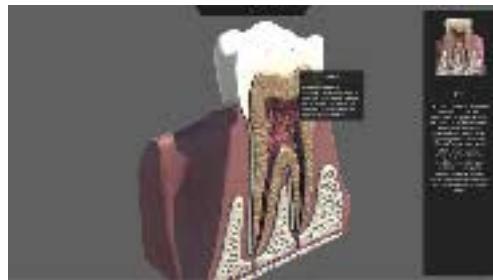

- «3D models of viruses»
- «Skin structure»
- «Structure of animal and plant cells»
- «Human digestive system structure»
- «General animal anatomy of an animal»
- «Human teeth structure»
- «3D molecules construction kit»
- «ENT organs anatomy»

Training dummies

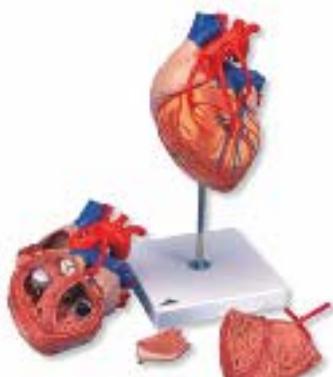

- «Training complex First aid. Adult torso dummy»
- «Training complex First aid. Foreign body removal. Adult torso dummy»
- «Training complex First aid. Child dummy»

Visual aids

- «Human heart structure, visual aid»
- «Human teeth structure, visual aid»

Human teeth structure, visual aid

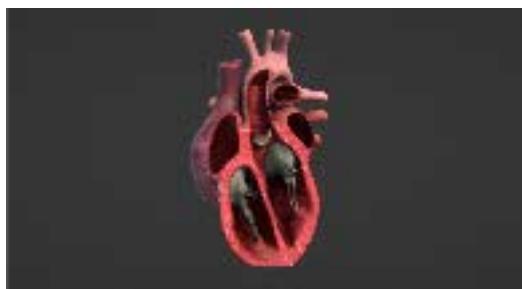

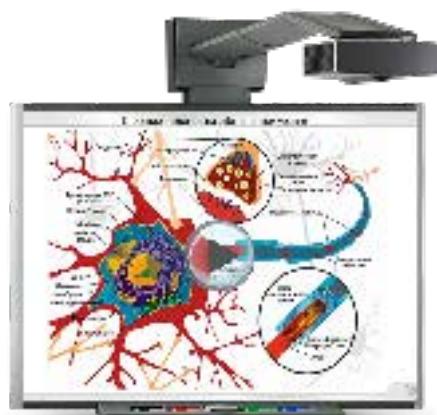

Human heart structure, visual aid

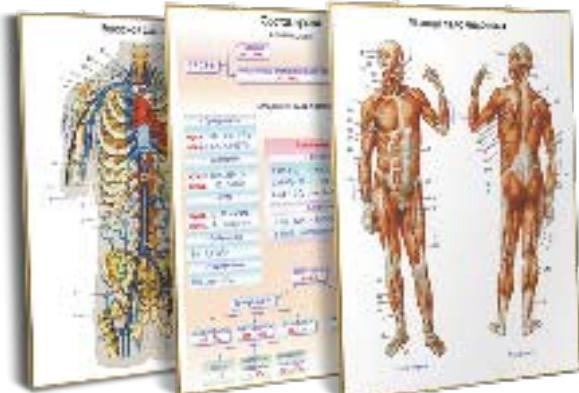

Interactive 3D human anatomy atlas

Determination of human reaction time, standard teaching set

Heart anatomy and demonstration, virtual software package

**Interactive manuals (CD) and classroom posters**

- Central nervous system anatomy
- Biology
- Normal Human Anatomy
- Pediatrics. Healthy child
- Pediatric infections

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Training cardiodiagnostic simulator for functional diagnosticians

VETERINARY MEDICINE (EQUIPMENT AND TECHNOLOGIES)

Study labs and demonstration equipment

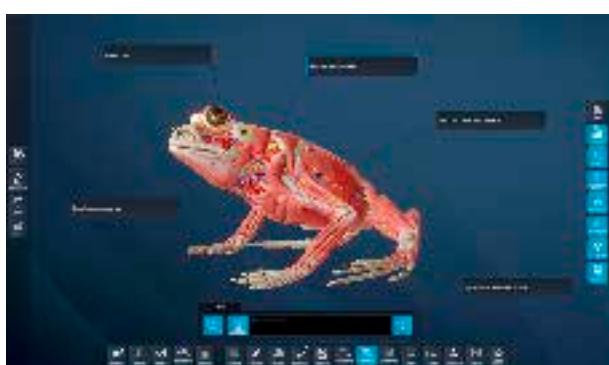

Interactive anatomical table - veterinary PL-VetAnatomy Tab, virtual training complex

Interactive three-dimensional atlas of animal anatomy PL-VetAnatomy

Pig anatomy atlas

Frog anatomy atlas

Virtual veterinary training complexes

- «Interactive anatomical table - veterinary PL-VetAnatomy Tab, virtual training complex»
- «Interactive three-dimensional atlas of animal anatomy PL-VetAnatomy, virtual training complex»
 - Frog anatomy atlas
 - Dog anatomy atlas
 - Cat anatomy atlas
 - Horse anatomy atlas
 - Pig anatomy atlas
 - Calle anatomy atlas
- «Veterinarian simulator, virtual training complex»

Interactive laboratory stands and simulators

- «Laboratory of Agriculture and Veterinary Medicine, interactive training class»
- «Cattle milking skills training, interactive complex»
- «Studying and practicing veterinary and surgical skills, training complex»
- «Cow rectal examination and artificial insemination, interactive training complex»
- «Horse Anatomy, interactive training complex»
- «Cow Anatomy, interactive training complex»
- «Pig Anatomy, interactive training complex»
- «Studying and practicing helping animals in labor, training complex»
- «Practicing intravenous procedures, interactive training complex»
- «Pharmacologist, interactive computer-controlled complex»

Models and training mock-ups

- «Methods and devices for fixing cattle, training hardware»
- «Skull of a domestic sheep»
- «Sheep's Skull» (scale 1:2)
- «Skeleton of a horse, scale model» (scale 1:2)
- «Skeleton of a cow, scale model» (scale 1:2)
- «Electric mock-up of a cow on a frame»
- «Skeleton of a dog, scale model» (scale 1:2)
- «Skeleton of a cat, scale model» (scale 1:2)

Crop growing complexes

- «Smart greenhouse lab complex»
- «City-farmer - vertical hydroponic installations, lab complex»

Board-stands

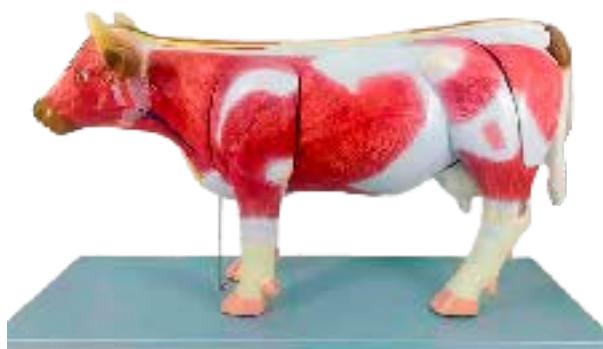

- «Substances primarily impacting the central nervous system»
- «Respiratory organs of farm animals»
- «Circulatory system of farm animals»
- «Aseptic and purulent inflammatory processes»
- «Epizootiology»
- «Acute drug poisoning of animals»
- «Typical pathological processes in animal organisms»
- «Antimicrobial and antiparasitic agents»

Horse Anatomy, interactive training complex

Veterinarian simulator, virtual training complex

Cow Anatomy, interactive training complex

Circulatory system of farm animals

Electric mock-up of a cow on a frame

**Interactive manuals (CD) and classroom posters**

- Technology of livestock products production (1 part)
- Technology of livestock products production (2 part)
- Mechanization, electrification and automation of agriculture

Poster set

- Agronomy
- Basics of agronomy
- Agricultural machines
- Cattle breeding
- Crop production

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

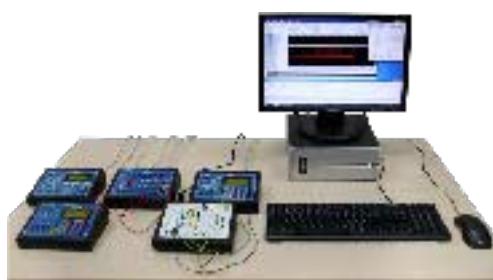

City-farmer - vertical hydroponic installations, lab complex

HOUSEHOLD APPLIANCES. CONSUMER GOODS INDUSTRY

Study labs and demonstration equipment

PC

Peripheral device interfaces

Microwave oven

Maintenance of heat exchangers

Sewing machine

Computers

- «PC»
 - «Peripheral device interfaces»
- Automation and computer technology systems elements**

Radio-electronic equipment

- «DVD player»
- «GOS 620 Oscilloscope»

Household appliances

- «Microwave oven»
- «Sewing machine»
- «Vacuum cleaner»
- «Electric stove»
- «Washing machine»
- «Refrigerator»
- «Freezer»
- «Air conditioner»
- «Maintenance of heat exchangers»
- «Gas leaks identification»
- «Repair and charging of a household refrigerator»
- «Assembly and disassembly of a compressor»
- «Maintenance of heat exchangers»
- «Split model for a refrigeration equipment compressor»

Training stands

- «Washing machine, Electric stove, Vacuum cleaner»
- «Freezer»
- «Refrigerator-1», «Refrigerator-2»
- «Air conditioner»
- «Sewing machine»
- «Chest freezer»
- «Electric stove»

Chest freezer

Washing machine, Electric stove
Vacuum cleaner

Electric stove

Freezer

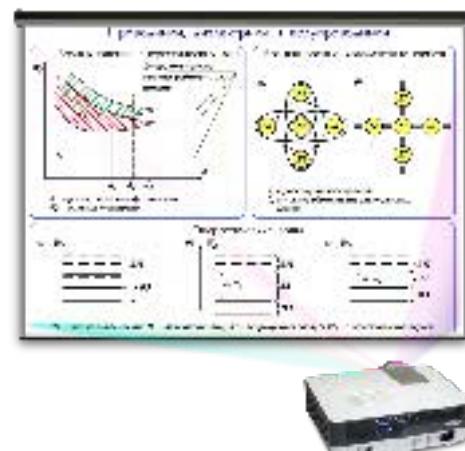

Refrigerator

Refrigerator-1

Refrigerator-2

Interactive manuals (CD) and classroom posters

- Electronics
- Sewing production equipment
- HGSV
- Public catering equipment

Demonstration complexes

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

LANGUAGE LABS. SIMULTANEOUS TRANSLATION SYSTEMS

Study labs and demonstration equipment

Lingua multimedia language lab

Language labs

- Class based on digital tape recorders "Lingvo-digital", 6-N workstations
- Multimedia class based on digital tape recorders "Lingvo-digital V", 6-N workstations
- A class based on a PC network and a Lingua switchboard, 6-N workstations
- Multimedia class based on a PC network and a Lingua switchboard, 6-N workstations
- Simultaneous translation system

Interactive manuals (CD) and classroom posters

- English
- German
- The USA: Country Studies

Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed interactive posters set.

Multimedia class based on digital tape recorders "Lingvo-digital V", 6-N workstations

Simultaneous translation system

DEMONSTRATION COMPLEXES. CONFERENCE SYSTEMS

Study labs and demonstration equipment

3D demo complexes. Virtual Reality Equipment

Demo-MP & Z + OS demonstration complex for 32 workstations (multimedia projector, sound amplifier system, feedback system)

Demonstration complexes

- «Demo-PP demonstration complex for up to 32 people based on a 50" plasma TV receiver»
- «Demo-MP demonstration complex for up to 75 people based on a multimedia projector»
- «Demo-MP & Z Demonstration complex for up to 150 people» (multimedia projector, sound amplifier system)
- «Demo-MP & Z + OS demonstration complex for 32 workstations» (multimedia projector, sound amplifier system, feedback system)
- «Demo CD-PE demonstration complex based on a multimedia projector» (laptop with a pre-installed set of electronic posters)
- «Demo CD-ID demo complex based on an interactive whiteboard» (laptop with a pre-installed set of electronic posters)
- «Comprehensive technical equipment of conference halls, meeting rooms, classrooms»

Visual aids

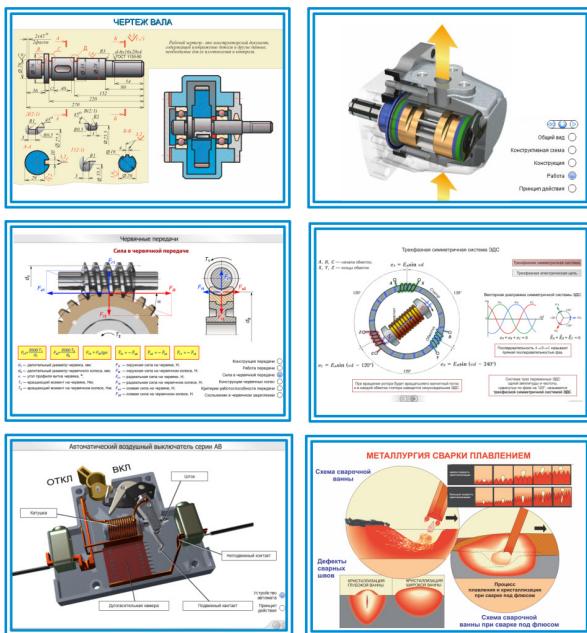

- Electronic posters CD sets and classroom posters (subjects):
 - English
 - German
 - The USA: Country Studies
- Basic equipment: projector, screen or interactive whiteboard, laptop, pre-installed set of electronic posters.

Comprehensive technical equipment of conference halls, meeting rooms, classrooms

INTERACTIVE VISUAL AIDS. POSTERS (FOR OFFICES, LABORATORIES AND CLASSROOMS)

Certificates of conformance

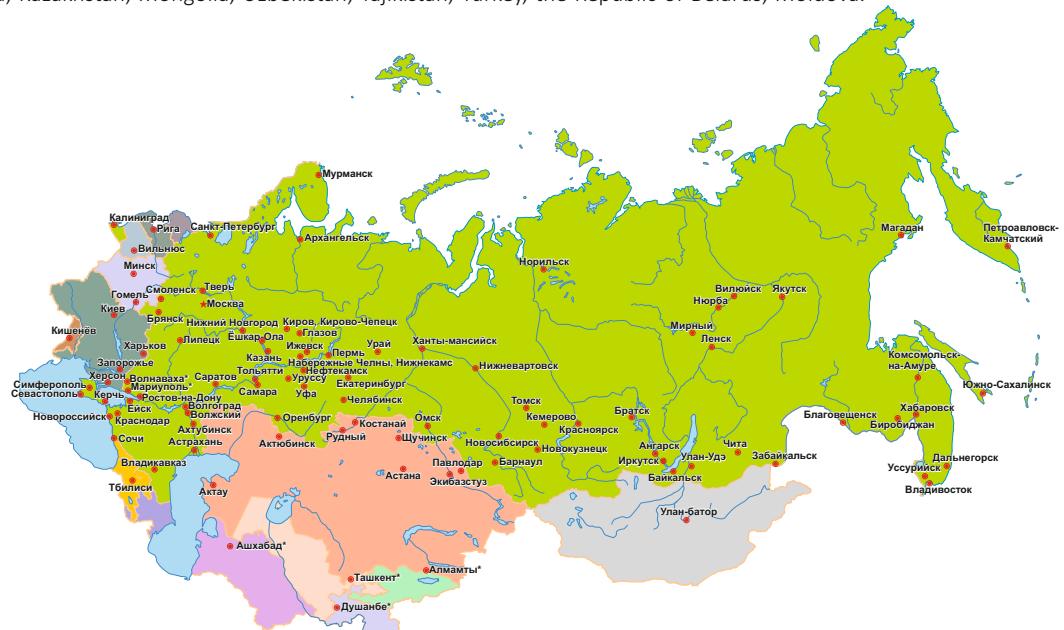

Patents and copyright certificates
for equipment and software

- Patents and copyright certificates, software registration certificates — 73 pcs.
- GRAND PRIX Cup (Moscow All-Russian Exhibition Center) as the best organization in Russia forming a contemporary educational environment
- GRAND PRIX Cup (Moscow All-Russian Exhibition Center) in the competition of innovative solutions in the field of material and technical support of educational institutions
- Crystal Cup (MARPUT — Moscow) for the best solutions in teaching equipment for higher professional education
- Diplomas of Honor and Laureate Diplomas — 21 pcs.
- Gold, silver and bronze medals of VDNKh (All-Russian Exhibition Center, Sokolniki) — 52 pcs.

Our main customers are more than 2,800 federal, national research, state and technical universities, agricultural, land reclamation, pedagogical and engineering and economic universities, vocational schools, colleges, lyceums and specialized schools in Russia, Kazakhstan, Mongolia, Uzbekistan, Tajikistan, Turkey, the Republic of Belarus, Moldova.

We provide consultations on how to equip educational laboratories and prepare the technical specifications for tenders. Our products comply with the requirements of educational standards, modern digital technologies (VR, AR, 3D) and design, reliability and safety, visibility and informativity are the fundamental distinctive features of the products manufactured by RDC Uchtekh-Profi.

RDC Uchtekh-Profi, 147 Kommuny Street, Chelyabinsk, 454080
